

TELL US!

How can we improve bicycling and walking in northeast Wisconsin?

Please participate in our online interactive Crowdsourcing Survey to tell us what concerns you have, or what improvements are needed, for **bicycling and walking** locally and regionally.

Based on what is learned from this survey, the Bay-Lake Regional Planning Commission will be able to plan for issues related to bicycle and pedestrian safety, local/regional connectivity, and recommend improvements to pedestrian and bicycle facilities throughout northeast Wisconsin.

Access the survey online at www.baylakerpc.org or by scanning the QR code below.

The online Crowdsourcing survey will be available through August 2018. We appreciate your help in improving bicycling and walking throughout northeast Wisconsin.

A silhouette illustration of various people walking and biking along a path. There are trees, streetlights, and a bench in the background. The scene is set against a green background that represents grass.
