

**SHEBOYGAN METROPOLITAN PLANNING AREA TRANSPORTATION IMPROVEMENT PROGRAM** 2020 - 2023

#### SHEBOYGAN METROPOLITAN PLANNING AREA TRANSPORTATION IMPROVEMENT PROGRAM CALENDAR YEARS 2020 - 2023

Prepared by: Bay-Lake Regional Planning Commission

November, 2019

Principal Author: Jeffrey C. Agee-Aguayo Bay-Lake Regional Planning Commission 425 South Adams Street, Suite 201 Green Bay, WI 54301 Phone: (920) 448-2820 FAX: (920) 448-2823 E-Mail Address: jage@baylakerpc.org

The preparation of this report was financed in part through a joint planning grant from the U.S. Department of Transportation, Federal Highway Administration, Federal Transit Administration and the Wisconsin Department of Transportation, under the provisions of Section 112 of the Federal Highway Act of 1973 and the Federal Transit Act of 1964 (as amended). Local funding was provided by Sheboygan County and by the Sheboygan Parking and Transit Utility.

The contents of this report reflect the views of the Bay-Lake Regional Planning Commission, which is responsible for the facts and the accuracy of the data presented herein. The contents do not necessarily reflect the official views and policies of the U.S. Department of Transportation. This report does not constitute a standard, specification or regulation.

#### **INTRODUCTION**

Federal regulations which govern the planning process in metropolitan planning areas require each metropolitan planning organization (MPO) to prepare a Transportation Improvement Program (TIP) consisting of a multiyear program of projects. Street and highway improvement projects, bicycle and pedestrian transportation projects, transit operating and capital projects, and elderly and disabled transportation operating and capital projects must be included in an approved TIP program of projects in order to be eligible for federal aid. The TIP also serves as a list of upcoming transportation projects, and covers a period of at least four years.

The TIP must be created in collaboration with the state and public transit providers. The TIP should incorporate all regionally significant projects receiving FHWA or FTA funds, or for which FHWA or FTA approval is required, in addition to non-federally funded projects that are consistent with the metropolitan long-range transportation plan. Furthermore, the TIP must be fiscally constrained.

Minor civil divisions within the Sheboygan Metropolitan Planning Area include: the Cities of Sheboygan and Sheboygan Falls; the Villages of Howards Grove and Kohler; the Town of Sheboygan; and portions of the Towns of Herman, Lima, Mosel, Sheboygan Falls and Wilson. Jurisdictions in the urbanized portion of the metropolitan planning area were requested to submit projects for consideration using Surface Transportation Block Grant (STBG) Urban funding; these projects were prioritized using the *STBG Urban Project Prioritization Policy* developed by the MPO (see Appendix G). It is anticipated that one or more projects will be awarded funding from the urbanized area allocation component of the STBG for the 2020 – 2025 cycle, and that this 2020 - 2023 TIP will be amended in early 2020 to include the project(s).

Street and highway projects were also requested of area municipalities, the Sheboygan County Transportation Department and the Wisconsin Department of Transportation.

Transit capital projects and operating expenses for the period covered by this TIP were requested of the Sheboygan Parking and Transit Utility. The Sheboygan County Health and Human Services Department's Aging and Disability Resource Center (ADRC) and the Wisconsin Department of Transportation submitted specialized transportation projects and capital items for inclusion in this TIP. In addition, any Transportation Alternatives Program (TAP) set-aside projects have been officially approved by the Wisconsin Department of Transportation, while other bicycle and pedestrian transportation projects (from the Non-Motorized Transportation Pilot Program) have been approved by Sheboygan County.

The priority system for street and highway, transit capital, and bicycle and pedestrian transportation projects is based on the programmed project year. Priorities are established by the responsible agencies in the submittal of projects to the Bay-Lake Regional Planning Commission for inclusion in the TIP, with the exception of STBG urbanized area allocation projects, which are prioritized by the MPO following project proposal submittals. The Bay-Lake Regional

Planning Commission then reviews the submitted projects based on compliance with short-range and long-range transportation plan recommendations, availability of federal, state and local transportation funds, and the air quality impacts of programmed improvements.

The Sheboygan MPO Technical and Policy Advisory Committees reviewed and recommended approval of this 2020 - 2023 TIP on October 24, 2019, and the Bay-Lake Regional Planning Commission approved this 2020 - 2023 TIP on October 25, 2019. Street and highway projects, transit operating funds and capital projects, elderly and disabled transportation and capital items, and bicycle and pedestrian transportation projects listed are in compliance with both short-range and long-range transportation plans for the Sheboygan Metropolitan Planning Area prepared by the Bay-Lake Regional Planning Commission.

#### TRANSPORTATION IMPROVEMENT PROGRAM

Transportation Improvement Programs (TIPs) have been completed or amended for the urbanized portion of the Sheboygan Metropolitan Planning Area since 1982, the year in which the Bay-Lake Regional Planning Commission was designated the Metropolitan Planning Organization (MPO) for the Sheboygan Urbanized Area. Following passage of the Intermodal Surface Transportation Efficiency Act (ISTEA) in 1991, both an urbanized area and a metropolitan planning area were required to be delineated following the 1990 Census; the long-range transportation plan and TIP were required to cover the larger metropolitan planning area (urbanized area plus territory outside the urbanized area expected to become urbanized in 20 years). Until recently, only projects in the smaller urbanized area were eligible for STBG urbanized area allocation funding; in the most recent funding cycles, MPOs have, at their discretion, been able to extend an existing STBG urbanized area allocation project which originates in the urbanized area outside that area as long as the entire project is within the metropolitan planning area. All maps in this document show the current (post-2010 Census) boundaries of the Sheboygan urbanized area and of the Sheboygan metropolitan planning area.

The TIP completed in 1982 listed projects only for the upcoming year, while TIPs completed in 1983 and 1984 were limited in scope to a three-year period. From 1985 to 1996, the TIP included projects for a five-year period. However, beginning with the 1998 - 2001 TIP completed and approved in 1997, new TIPs began to cover a four-year period, due to a relative lack of projects in the fifth program year.

The 2020 - 2023 TIP is a listing of transit operating expenses and capital items, elderly and disabled transportation projects and capital items, bicycle and pedestrian transportation projects, and street and highway projects, including an element which is eligible for federal aid and covers calendar years 2020, 2021, 2022 and 2023. This element contains those projects in the Sheboygan Metropolitan Planning Area which have highest priority as far as funding and implementation are concerned. It is estimated that over \$37,666,000 will be needed to meet anticipated project costs in the four year element component of the TIP.

- In 2020, the costs will include nearly \$3,688,000 for transit operating expenses, \$1,225,000 for transit capital projects, nearly \$512,000 for elderly and disabled transportation operating expenses, \$0 for elderly and disabled transportation capital items, \$447,000 for bicycle and pedestrian transportation projects, and \$7,556,000 for street and highway projects.
- In 2021, the costs will include nearly \$3,725,000 for transit operating expenses, \$0 for transit capital projects, \$0 for elderly and disabled transportation capital items, \$4,091,000 for bicycle and pedestrian transportation projects, and \$4,154,000 for street and highway projects.
- In 2022, the costs will include nearly \$3,762,000 for transit operating expenses, \$0 for transit capital projects, \$0 for elderly and disabled capital items, \$191,000 for bicycle and pedestrian transportation projects, and \$1,998,000 for street and highway projects.
- In 2023, the costs will include over \$3,799,000 for transit operating expenses, \$200,000 for transit capital projects, \$0 for elderly and disabled transportation capital projects, \$175,000 for bicycle and pedestrian transportation projects, and \$2,144,000 for street and highway projects.

Elderly and disabled transportation operating expenses typically are not programmed beyond one calendar year. Projects funded by the STBG program's transportation alternatives set-aside and by the Congestion Mitigation and Air Quality improvement program (CMAQ) have been officially approved by the Wisconsin Department of Transportation, while most bicycle and pedestrian transportation projects (from the Sheboygan County Non-Motorized Transportation Pilot Program) have been approved by Sheboygan County for the period covered by this TIP.

The next section of the TIP describes various transit projects which are scheduled for the program period, including transit operational funding, transit capital projects, elderly and disabled transportation operating expenses, and elderly and disabled transportation capital projects. This will be followed by a listing of bicycle and pedestrian transportation projects in the Sheboygan metropolitan planning area. This in turn will be followed by a description of the various street and highway projects which are scheduled for the program period.

A subsequent section of the main body of the TIP involves evidence of the financial capacity to complete all transit operating, transit capital, elderly and disabled transportation operating expenses, elderly and disabled transportation capital items, bicycle and pedestrian transportation projects, and street and highway projects listed in the TIP. A summary of the public participation process used in the development of this TIP is included as well. Another section of the TIP discusses the implementation status of projects recommended for 2019 in the *Sheboygan Metropolitan Planning Area TIP: Calendar Years 2019 – 2022* (including amendments to that TIP processed in 2019). A later section of the TIP discusses the air quality conformity process followed in the development of the TIP. This is followed by a statement on impacts of TIP projects on environmental justice. This in turn is followed by discussion concerning clarification of planning procedures and the federal "Fixing America's Surface Transportation (FAST)" Act,

which allows for a certain degree of flexibility in project selection. The final section of the main body of this document discusses TIP amendment guidelines.

Ten appendices are included in this TIP, and involve the following information:

- Appendix A: Glossary of Terms;
- Appendix B: Procedures for the Involvement of Private Enterprise in Transit Programs;
- Appendix C: Air Quality Conformity Statement;
- Appendix D: Financial Capacity Assessment of Shoreline Metro;
- Appendix E: Statement of Impacts of TIP Projects on Environmental Justice;
- Appendix F: MPO Approval of TIP;
- Appendix G: STBG Urban Project Prioritization Policy;
- Appendix H: Transition in Programming from MAP-21 to FAST Act Funding Programs;
- Appendix I: Performance Measures in the Sheboygan Metropolitan Planning Area TIP; and
- Appendix J: Sheboygan MPO Technical and Policy Advisory Committees.

## **Transit Projects**

## Transit Operational Funding: 2020 - 2023

Table 1 lists the distribution of operational funding sources for the transit division of the Sheboygan Parking and Transit Utility (Shoreline Metro) for the 2020 – 2023 program period. Table 1 includes Shoreline Metro's core fixed-route transit service in the Cities of Sheboygan and Sheboygan Falls and in the Village of Kohler, and also includes ADA paratransit costs within the Shoreline Metro service area. Operating and administrative costs are assumed to increase by 1.0 percent each year between 2020 and 2023. Costs shown in Table 1 assume that route changes will be implemented at the beginning of any given calendar year, and also assume maintenance of existing transit service (no expansions).

Projected revenues are also shown in Table 1. Federal Section 5307 (general operating) revenues are anticipated in involve approximately 31.28 percent of operating costs each year throughout the period covered by this TIP. Table 1 also assumes that the Sheboygan Parking and Transit Utility will receive and utilize Community Development Block Grant (CDBG) entitlement funding (provided to the City of Sheboygan by the U.S. Department of Housing and Urban Development on an annual basis) to maintain transit services at a reasonable cost to the transit user and to the taxpayer each year over the program period; \$42,493 in CDBG funding is assumed to be available in each year covered by this TIP.

State Section 85.20 (general operating) revenues are assumed to involve approximately 26.02 percent of operating expenses throughout the period covered by this TIP. State Section 85.205 (paratransit supplemental) revenues are assumed to involve \$43,194 each year throughout the period covered by this TIP.

Municipal funding of transit begins at a base level of \$519,515 for the City of Sheboygan, \$38,696 for the City of Sheboygan Falls, \$13,366 for the Village of Kohler, and \$90,000 for the Sheboygan Area School District in 2020. The municipal share of transit funding is expected to increase by approximately 2.38 percent from 2020 to 2021, by approximately 2.35 percent from 2021 to 2022, and by approximately 2.32 percent from 2022 to 2023. Municipal funding of transit covers approximately 17.94 percent of total expenses in 2020, 18.19 percent of total expenses in 2021, 18.43 percent of total expenses in 2022, and 18.67 percent of total expenses in 2023. The City of Sheboygan is assumed to provide approximately 78.5 percent of local funding sources for transit operation. The City of Sheboygan Falls is assumed to provide approximately 5.9 percent of local funding sources for transit operation. The Sheboygan Area School District is assumed to provide approximately 13.6 percent of local funding sources for transit operation.

Farebox revenues used to finance transit service begin at a base level of \$630,000 in 2020, then are assumed to remain at this level throughout the period covered by this TIP. Farebox funding of transit covers approximately 17.08 percent of total expenses in 2020, 16.91 percent of total expenses in 2021, 16.75 percent of total expenses in 2022, and 16.58 percent of total expenses in 2023. Other revenues (advertising and proprietary revenues, interest income, etc.) are assumed to remain flat (\$197,495 each year) in absolute terms throughout the period covered by this TIP.

Calendar Ye	Table 1 ars 2020 - 2023: Trans	sit Operating Funds		
	(TIP ID No.: 372-20	-201)		
	2020	2021	2022	2023
Operating Expenses	\$3,687,657	\$3,724,534	\$3,761,779	\$3,799,397
Farebox Revenue	\$630,000	\$630,000	\$630,000	\$630,000
Other Revenue (Advertising, Investments, etc.)	\$197,495	\$197,495	\$197,495	\$197,495
Total Deficit	\$2,860,162	\$2,897,039	\$2,934,284	\$2,971,902
Federal Funding Sources:				
Section 5307	\$1,153,325	\$1,164,858	\$1,176,507	\$1,188,272
HUD CDBG Entitlement Funds	\$42,493	\$42,493	\$42,493	\$42,493
State Funding Sources:				
Section 85.20	\$959,573	\$969,169	\$978,860	\$988,649
Section 85.205	\$43,194	\$43,194	\$43,194	\$43,194
Local Funding Sources:				
City of Sheboygan	\$519,515	\$531,881	\$544,370	\$556,986
City of Sheboygan Falls	\$38,696	\$39,617	\$40,547	\$41,487
Village of Kohler	\$13,366	\$13,684	\$14,006	\$14,330
Sheboygan Area School District	\$90,000	\$92,143	\$94,306	\$96,491
Total Funding	\$2,860,162	\$2,897,039	\$2,934,284	\$2,971,903
Balance	\$0	\$0	\$0	\$1

Assumptions made in developing Table 1:

(1) Operating and administrative costs are assumed to increase by 1.0 percent each year throughout the period covered by this TIP.

(2) ADA paratransit costs are included in operating expenses. All other paratransit costs can be found in Table 3.

(3) Farebox revenues are assumed to remain flat in absolute dollars throughout the period covered by this TIP.

(4) Other revenues (advertising and proprietary revenues, interest income, etc.) are assumed to remain flat in absolute dollars throughout the period covered by this TIP.

(5) Federal Section 5307 (general operating) revenues are assumed to involve approximately 31.28 percent of operating expenses throughout the period covered by this TIP.

(6) Shoreline Metro expects to continue utilizing Community Development Block Grant (CDBG) Entitlement funding (provided to the City of Sheboygan by the U.S. Department of Housing and Urban Development on an annual basis) to maintain transit services at a reasonable cost to the transit user and to the taxpayer each year over the program period. The amount in each year covered by this TIP will be \$42,493.

(7) State Section 85.20 (general operating) revenues are assumed to involve approximately 26.02 percent of operating expenses throughout the period covered by this TIP.

(8) State Section 85.205 (paratransit supplemental) revenues will involve \$43,194 each year throughout the period covered by this TIP.

(9) The City of Sheboygan is assumed to provide approximately 78.5 percent of local funding sources for transit operation. The City of Sheboygan Falls is assumed to provide approximately 5.9 percent of local funding sources for transit operation. The Village of Kohler is assumed to provide approximately 2.0 percent of local funding sources for transit operation. The Sheboygan Area School District is assumed to provide approximately 13.6 percent of local funding sources for transit operation.

(10) Figures represented in this table assume maintenance of existing transit service (no expansions).

(11) Balances of \$1 or less (positive or negative) are due to rounding error.

Source: City of Sheboygan Parking and Transit Utility, 2019; and Bay-Lake Regional Planning Commission, 2019.

### Transit Capital Projects: 2020 – 2023

Table 2 lists capital projects for the transit division of the Sheboygan Parking and Transit Utility (Shoreline Metro) for the 2020 – 2023 period. Of these projects, two capital projects are programmed for 2020, no capital projects are programmed for 2021 or 2022, and one capital project is programmed for 2023.

Two capital expenditures are recommended for calendar year 2020:

- The roof of Shoreline Metro's administration and maintenance facility is scheduled to be replaced in 2020. The roof of the facility is in poor condition and is beginning to cause damage to internal elements of the facility. Multiple sections require replacement in the next one to three years. Due to the condition of the roof, repairs cannot be performed. The cost of this 2020 project is \$750,000. The federal share of funding for this project is estimated to cover less than 47 percent of the total cost, and will come from the FTA Section 5339 capital program. This project is consistent with Transit Asset Management (TAM) plans for Shoreline Metro and for the MPO.
- One (1) fixed-route bus (with a length of 35 feet) is expected to be purchased in 2020. This new bus will be used to replace one older bus that will have exceeded its life expectancy at the time of replacement. The new bus will provide a better transportation experience for passengers as well as reduce operating budget maintenance and repair costs. Shoreline Metro staff notes that from the time a purchase order is issued for new buses, it typically takes about one year for delivery. The cost of this 2020 project is \$475,000. The non-local share for this project (80 percent) will come from the Volkswagen Diesel Emissions Environmental Mitigation Trust being administered by the Wisconsin Department of Administration, while the local share (20 percent) will come from state shared revenue received by the City of Sheboygan.

No capital expenditures are recommended for calendar year 2021. However, one (1) capital expenditure is listed as an illustrative project for calendar year 2021, and will be added to the TIP as funding materializes:

• Purchase of four (4) fixed-route buses (with a length of 35 feet each) is an illustrative project for 2021. These new buses would be used to replace four older buses that will have exceeded their life expectancy at the time of replacement. The planning justification for this project is similar to that for the 2020 fixed-route bus acquisition. The cost of this 2021 illustrative project would be \$1,840,000. If funded, the federal share of this project could come from a variety of sources, including the FTA Section 5339 capital program or from the Congestion Mitigation and Air Quality (CMAQ) program.

No capital expenditures are recommended for calendar year 2022. However, one (1) capital expenditure is listed as an illustrative project for calendar year 2022, and will be added to the TIP as funding materializes:

• Purchase of four (4) fixed-route buses (with a length of 35 feet each) is an illustrative project for 2022. These new buses would be used to replace four older buses that will

have exceeded their life expectancy at the time of replacement. Again, the planning justification for this project is similar to that for the 2020 fixed-route bus acquisition. The cost of this 2022 illustrative project would be \$1,840,000. If funded, the federal share of this project could come from a variety of sources, including the FTA Section 5339 capital program or from CMAQ.

One (1) capital expenditure is recommended for calendar year 2023:

• Improvements to the transit administrative and maintenance facility are scheduled for 2023. Shoreline Metro needs to complete an inspection of the facility to see which areas will need rehabilitation. Possible items that will be improved include the heating and air conditioning systems, maintenance upgrades, the bus wash, doors, and other items. The cost of this 2023 illustrative project would be \$200,000. At this time, it appears that this project will be completely locally funded.

								Calendar Yea (I	Table 2 Calendar Years 2020 - 2023: Transit Capital Items (In Thousands of Dollars)	2 1: Transit Capi of Dollars)	ital Items

#### **Elderly and Disabled Transportation Operating Expenses: 2020**

Elderly and disabled transportation operating expenses are identified in Table 3. The Sheboygan County Health and Human Services Department's Aging and Disability Resource Center (ADRC), which handles elderly and disabled transportation in the Sheboygan Metropolitan Planning Area and elsewhere in Sheboygan County, normally does not program operating expenses beyond one calendar year. The projects identified in Table 3 involve operating expenses for calendar year 2020. The projects include an enhanced volunteer driver program and the purchase of specialized (elderly and disabled, but non-ADA) transportation services from Shoreline Metro (operating as Metro Connection).

The enhanced volunteer driver program is provided by volunteers using their own vehicles. Volunteers receive mileage reimbursement. Services are available throughout Sheboygan County (including the transit service area), and occasionally, passengers are transported outside the county for specialized medical services. Persons using this service must be ambulatory and have no other means of transportation. Service is door-to-door.

## Elderly and Disabled Transportation Capital Projects: 2020 – 2023

Elderly and disabled transportation capital projects are identified in Table 4. For the 2020 funding cycle, the Sheboygan County Health and Human Services Department's ADRC has filed a Section 5310 grant application with WisDOT for the purchase of one diesel-powered medium sized bus with a configuration of up to eleven (11) ambulatory positions and up to two (2) wheelchair positions. If awarded, the vehicle would involve 80 percent federal funding (with 20 percent local or sponsor funding). All projects identified in Table 4 are listed as "illustrative projects;" if any of these projects are awarded funding by WisDOT, the projects will be officially programmed in this TIP. Additional vehicles are expected to be acquired through future Section 5310 grant applications in 2021 and 2022 based on review and updating of the *2016 Coordinated Public Transit – Human Services Transportation Plan for Sheboygan County* (as amended) and the capital programs of Sheboygan County and Shoreline Metro. Shoreline Metro intends to acquire one diesel-powered medium sized bus, through one project, listed as an illustrative project, in the 2022 funding cycle. No elderly and disabled transportation capital projects are listed at this time for the 2023 funding cycle.

In the State of Wisconsin, with the exception of larger (over 200,000 population) urbanized areas (which are required to have their own selection processes), WisDOT reviews all Section 5310 vehicle grant applications from public and private non-profit agencies, ranks the applications, and selects the top projects to be included in a single state Section 5310 grant application to the FTA.

## **Bicycle and Pedestrian Transportation Projects**

One bicycle and pedestrian transportation project has been officially approved by the Wisconsin Department of Transportation for the period covered by this TIP; this is evident in Table 5:

• Some \$175,000 is programmed in each of calendar years 2020, 2021, 2022 and 2023 for "grouped" transportation alternative projects that may occur in the Sheboygan Metropolitan Planning Area. This bicycle and pedestrian transportation project involves 80 percent federal participation and 20 percent state participation.

In addition, as indicated in Table 5, Sheboygan County has approved the following projects to be implemented under its Non-Motorized Transportation Pilot Program (NMTPP, a federal earmark in SAFETEA-LU awarded to Sheboygan County) over the period covered by the TIP:

- Sheboygan County NMTPP: Level of effort for program oversight, including education and outreach (\$14,000 in 2020, \$16,000 in 2021, and \$16,000 in 2022);
- NMTPP marketing/branding (\$8,000 in 2020); and
- County Highway PP from the Sheboygan River Bridge to South 24th Street: Conversion into a linear parkway and trail facility (\$250,000 for design in 2020, and \$3,900,000 for construction in 2021).

With the exception of the County Highway PP project (which involves a local share in its construction component), the NMTPP projects indicated above involve 100 percent federal funding.

In addition, Table 5 includes six (6) illustrative projects that are not officially programmed in the 2020 - 2023 TIP:

- Union Pacific rails-to-trails conversion extension in the City of Sheboygan: Pennsylvania Avenue to Union Avenue, including an eastern extension of South 9th Street paralleling Indiana Avenue (\$426,000 for design in 2021, \$500,000 for right-of-way acquisition in 2021, and \$4,004,000 for construction in 2022);
- Construction of a bridge for bicyclists and pedestrians over the Sheboygan River near the former Tecumseh Engines plant in the City of Sheboygan Falls (\$64,000 for design in 2021, and \$319,000 for construction in 2022);
- Construction of multi-use pathways on North Taylor Drive between Kohler Memorial Drive and Superior Avenue and from the intersection of North Taylor Drive and North Avenue into Evergreen Park (\$36,000 for design in 2021, and \$144,000 for construction in 2022);
- Construction of a bridge for bicyclists and pedestrians over the Sheboygan River near the Bemis Manufacturing plant in the City of Sheboygan Falls (\$93,000 for design in 2021, and \$463,000 for construction in 2022);
- Construction of a multi-use pathway in the Alliant Energy Utility Corridor on the south side of the City of Sheboygan from South Taylor Drive to County Highway OK/South

Business Drive (\$91,000 for design in 2021, and \$2,000,000 for construction in 2022); and

• Construction of a multi-use pathway in the Alliant Energy Utility Corridor on the south side of the City of Sheboygan from County Highway KK/South 12th Street to Lakeshore Drive (\$91,000 for design in 2021, and \$2,000,000 for construction in 2022).

If funding becomes available, the 2020 - 2023 TIP may be amended to include one or more of these illustrative projects.

## **Street and Highway Improvement Projects**

Table 6 describes those street and highway improvement projects which are scheduled for the 2020 - 2023 program period. A wide variety of street and highway improvements will take place over the 2020 - 2023 period, including:

- One (1) reconstruction project with no increase in capacity;
- One (1) roundabout construction project;
- Three (3) signal timing projects;
- One (1) median cable guard installation project;
- One (1) project involving design leading to resurfacing; and
- One (1) project involving design and right-of-way acquisition leading to reconstruction.

WisDOT "grouped" projects are also listed in Table 6 for 2020, 2021, 2022 and 2023 in the areas of: Safety; railroad/highway crossing safety; HSIP/Highway Safety Improvement Program; railroad crossing protective devices; Office of the Commissioner of Railroads (OCR) rail-highway safety; Interstate highway system preventive maintenance; National Highway System preventive maintenance.

Of the eight (8) specific street and highway projects authorized in this 2020 – 2023 TIP:

- Three (3) projects are scheduled for construction in 2020;
- One (1) project is scheduled for construction in 2021;
- Three (3) projects are scheduled for design in 2020, and implementation in 2021; and
- One (1) project is scheduled for design in 2021, 2022 and 2023, and right-of-way acquisition in 2023.

Map 1 indicates specific projects to be implemented over the period covered by this TIP.

In addition to specific street and highway improvement projects, approval of this 2020 – 2023 *TIP* also implies approval of several Wisconsin Department of Transportation "grouped" projects (which are of a region-level scope) when they occur in the Sheboygan Metropolitan Planning Area. These "grouped" projects are classified in the following categories: (1) traffic safety; (2) the statewide highway safety improvement program (HSIP); (3) regional railroad crossing projects; (4) region-wide hazardous waste; (5) wetland mitigation bank; (6) state highway rehabilitation; (7) pavement marking; (8) traffic operations; and (9) maintenance resurfacing. These projects involve only federal and state transportation funds, involve work on the state trunk highway system, and are expected to involve minimal funding levels within the Sheboygan Metropolitan Planning Area.

# FINANCIAL PLAN FOR THIS TRANSPORTATION IMPROVEMENT PROGRAM

An addition to Transportation Improvement Programs (TIPs) and TIP Amendments resulting from federal surface transportation in recent years, including the "Fixing America's Surface Transportation" (FAST) Act, is a financial plan which documents that funding is available to meet expenditures for projects receiving federal funding throughout the period covered by a TIP or TIP Amendment.

Table 7 discusses available federal funding for the 2020 - 2023 TIP in thousands of dollars, and demonstrates the ability of available funding sources to implement the projects programmed in the TIP. Programmed expenditures in the TIP have been compared to the funding estimated to be available. Included in Table 7 are federal highway and federal transit funding sources. In the event of the over-programming of funds, the MPO advisory committees will work to resolve the discrepancy; this may involve the use of alternative federal and/or state funding sources.

Table 7 reflects an annual inflation factor of 1.56 percent for programmed expenditures and an estimated inflation factor of 2.00 percent for available funding in nearly all highway and transit programs; exceptions include the transportation alternatives set-aside within the Surface Transportation Block Grant (STBG) program, as well as the Congestion Mitigation and Air Quality improvement program (CMAQ), where funding was not inflated at all. Most inflation factors used in this financial plan were based on guidance from staff at the WisDOT Bureau of Planning and Economic Development that was issued to Wisconsin MPOs in the development of their financial plans for their long-range transportation plans and TIPs in June of 2019; the Sheboygan Parking and Transit Utility consulted with the MPO on transit-related inflation factors.

Table 7 indicates that the following street and highway and bicycle and pedestrian project categories in the 2020 - 2023 TIP are adequately funded when taken as a whole for the program period:

- National Highway Performance Program (NHPP), including what were National Highway System and Interstate Maintenance funding sources under SAFETEA-LU, and also funding bridge improvements on the National Highway System. One regular NHPP project is funded in Table 6, while three categories of WisDOT "grouped" NHPP projects are funded in Table 6.
- Surface Transportation Block Grant (STBG) program, including projects that were originally included under the STP funding category as well as any bridge improvements off the National Highway System in SAFETEA-LU, along with the STP Urban and the Transportation Alternatives programs in SAFETEA-LU and in MAP-21. One regular STBG project is funded in Table 6, while two categories of WisDOT "grouped" STBG projects are funded in Tables 5 and 6. One STBG "grouped" project involves a transportation alternatives set-aside.

Source: Bay-Lake Regional Planning Commission, 2019.	anning Commission, 2019.										

- Highway Safety Improvement Program (HSIP): One regular HSIP project is funded in Table 6, while two categories of WisDOT "grouped" HSIP projects are funded in Table 6.
- Rail-Highway Grade Crossing Set-Aside (HSIP-RR): Two categories of WisDOT "grouped" HSIP-RR projects are funded in Table 6.
- Congestion Mitigation and Air Quality Improvement Program (CMAQ) funding will be available to finance three signal timing projects in the Sheboygan Metropolitan Planning Area, with design occurring in 2020 and implementation occurring in 2021.
- Sheboygan County Non-Motorized Transportation Pilot Program (NMTPP): Three NMTPP projects are funded in Table 5.

As far as transit is concerned:

- Section 5307 transit operational funds will be available in stable amounts for the regular operations of Shoreline Metro over the program period, as noted in Table 1.
- Based on recent trends, and when taken as a whole, transit capital funding should be available to finance the roof replacement for the transit administration and maintenance facility in 2020 (Table 2). One (1) capital item is being funded by non-governmental sources (the Volkswagen Diesel Emissions Environmental Mitigation Trust), while two (2) capital items are listed as illustrative projects in Table 2. Section 5339 FTA funding will be the primary federal funding source for transit capital items at Shoreline Metro and at other small urbanized transit operations in Wisconsin. In the event that Section 5339 funding is not available, Section 5307 FTA funding will be the federal funding source for transit capital items.
- Section 5310 funding is being programmed for the Enhanced Volunteer Driver Program through the Sheboygan County Health and Human Services Department in 2020 (Table 3), but no capital projects are being programmed in the 2020 2023 TIP. All projects listed in Table 4 are illustrative at this time, and the TIP will be amended if funding materializes for one or more of the elderly and disabled transportation capital projects listed in Table 4.

Annual roadway and transit revenue estimates for the Sheboygan metropolitan planning area are shown in Table 8. Table 8 shows average annual funding for roadway construction, roadway maintenance and operations, transit operating, and transit capital. For maintenance and operations involving state trunk highways, an average of \$3,600,000 in federal and state funding is provided in the metropolitan planning area. For maintenance and operations involving local roadways, an average of \$809,000 in federal and state funding is provided, while an average of \$10,224,000 in local funding is provided in the metropolitan planning area. For maintenance and operations involving transit, an average of \$2,230,000 in federal and state funding, \$685,000 in local funding, \$630,000 in farebox revenues, and \$197,000 in other revenues is provided for the one transit operation (Shoreline Metro) in the metropolitan planning area.

#### PUBLIC PARTICIPATION PROCESS

In 2016, the Bay-Lake Regional Planning Commission updated its Public Participation Plan for all transportation plans and programs developed for the Sheboygan MPO. The following narrative outlines the public involvement process used in the development of this 2020 - 2023 *TIP* for the Sheboygan Metropolitan Planning Area.

The Bay-Lake Regional Planning Commission published a Notice of Request for Comment on the draft 2020 – 2023 Transportation Improvement Program for the Sheboygan Metropolitan Planning Area in a local newspaper as well as through social media. This notice informed the public of the availability of draft copies of the TIP at key locations in the Sheboygan Metropolitan Planning Area, and solicited public input on the draft TIP. This Notice of Request for Comment was also mailed to individuals and organizations on the MPO Public Participation Plan mailing list. This Notice of Request for Comment listed approximate and actual dates of all significant meetings and hearings concerning the TIP, and included a public hearing announcement. Draft copies of the TIP were made available (at five public review locations in the Sheboygan area as well as on the Sheboygan MPO webpage linked to the Bay-Lake Regional Planning Commission website) for a period of 30 days. A public hearing on the draft TIP was held during this review period.

Comments received on the draft TIP were forwarded to the MPO Technical and Policy Advisory Committees for their consideration. Following the public hearing, the MPO Technical and Policy Advisory Committees reviewed the draft TIP and public input, and made their recommendation to the Bay-Lake Regional Planning Commission. Comments received at the public hearing, written comments received during the public comment period, and the recommendation from the MPO Technical and Policy Advisory Committees were then forwarded to the Bay-Lake Regional Planning Commission for its consideration.

The following was a schedule of events for public involvement in the development of the 2020 - 2023 TIP:

September 25, 2019

Notice of Request for Public Comment on the draft 2020 – 2023 TIP published in a local newspaper, sent to other local media and publicized via social media. Significant meetings and hearings concerning the TIP were listed in the notice, including notice of the public hearing concerning the TIP. Draft TIP made available for public review at five locations in the Sheboygan Metropolitan Planning Area and on the MPO webpage on the Bay-Lake Regional Planning Commission website

September 25, 2019	Notice of Request for Public Comment on the draft 2020 – 2023 TIP was made available to individuals and organizations on the MPO Public Participation Plan mailing list.
September 25, 2019	Draft TIP made available for public review through October 24, 2019.
October 16, 2019	Public Hearing on the 2020 – 2023 TIP.
October 24, 2019	MPO Technical and Policy Advisory Committees considered public comments and made a recommendation to the Bay-Lake Regional Planning Commission.
October 25, 2019	Bay-Lake Regional Planning Commission Executive Committee meeting: Consideration of written comments, comments from the public hearing and recommendation of the MPO Technical and Policy Advisory Committees, and Commission action on the final TIP.
November, 2019	Formal transmittal of the final TIP to applicable state and federal agencies.

The public hearing concerning the 2020 - 2023 TIP was held from 4:00 p.m. to 5:00 p.m. on October 16, 2019, at the Mead Public Library (Rocca Meeting Room), 710 North 8th Street, Sheboygan. Two individuals attended the public hearing: Polly Abts, representing Lakeshore Technical College (LTC); and James Giefer, an interested citizen from the City of Sheboygan. Commission staff prepared several items for this public hearing, including: a sign-in sheet; a Power Point presentation regarding the 2020 - 2023 TIP; a packet of key tables in the 2020 - 20232023 TIP; comment sheets; and large display maps that were set up in the public hearing room and showed the location of proposed street and highway projects in the TIP, the location of street and highway projects completed in 2019 in the previous TIP, and the environmental justice impacts of street and highway and bicycle and pedestrian transportation projects in the draft TIP as well as of the current Shoreline Metro route structure. During his public hearing presentation, Jeffrey Agee-Aguayo gave background information on the TIP, gave the Power Point presentation regarding the TIP, and identified the five maps in the public hearing room. The floor was then open to questions and comments. Polly Abts discussed ways in which LTC could be better served by the Sheboygan area transportation network, and Jeffrey Agee-Aguayo discussed transportation programs that LTC could take advantage of, particularly in the areas of transportation involving career preparation and internships. James Giefer indicated that he would like to see the TIP address traffic on Union Avenue between South 26<sup>th</sup> Street and South Taylor Drive, particularly with the addition of the emerging Aurora Hospital in the vicinity. Mr. Giefer indicated that turning lanes would be helpful in this corridor, particularly in the vicinity of Horace Mann Middle School and a nearby large apartment complex. Mr. Giefer advocated for

improved bicycle accommodations to safely get residents in this area to the Taylor Drive bicycle and pedestrian pathway.

Written comments were received from James Giefer at the public hearing, as well as from Edward Procek (Sheboygan County Board Supervisor representing District 7 and Bay-Lake Regional Planning Commissioner) after the public hearing. Mr. Geifer's written comments were similar to his oral comments at the public hearing. Mr. Procek discussed Shoreline Metro's continuing operating and capital needs, and advocated for improvements to the South Taylor Drive/Union Avenue intersection, along with continuing to support an interchange at Interstate Highway 43 and County Highway PP/Indiana Avenue.

## IMPLEMENTATION STATUS OF PROJECTS RECOMMENDED FOR 2019 IN THE SHEBOYGAN METROPOLITAN PLANNING AREA TIP

Several projects have been completed in the Sheboygan Metropolitan Planning Area since the TIP process began. Street and highway projects recommended for 2019 in the 2019 - 2022 TIP (approved in October 2018, and amended three times thereafter) which were completed or in progress at the end of 2019 are identified on Map 2. Table 9 indicates a summary of the progress made on transit operations and capital items, elderly and disabled transportation operations and capital items, bicycle and pedestrian transportation projects, and street and highway improvement projects which were scheduled for 2019 in the 2019 - 2022 TIP. Table 9 identifies projects scheduled in the 2019 - 2022 TIP for 2019, and includes information such as project location, jurisdiction, project description, and project status.

## AIR QUALITY CONFORMITY STATEMENT

The air quality conformity statement for this 2020 - 2023 TIP can be found in Appendix C. The conformity statement has been prepared for both the TIP and the Update to the Year 2045 Sheboygan Area Transportation Plan (SATP). The Update to the Year 2045 SATP (and this 2020 - 2023 TIP which implements that plan) demonstrates conformity against a State Implementation Plan (SIP) in which USEPA found motor vehicle emission budgets adequate for Sheboygan County; emission budgets in the SIP were developed using the MOVES 2014b emissions estimating model, and the conformity analysis found in Appendix C utilized emission factors produced by MOVES 2014b to demonstrate conformity for all of Sheboygan County, since the county has been designated a nonattainment area for the 2008 eight-hour standard for ground-level ozone for several years.

## STATEMENT OF IMPACTS OF TIP PROJECTS ON ENVIRONMENTAL JUSTICE

Taken as a whole, the projects in this Transportation Improvement Program, together with the other publicly and privately funded transportation improvements and services provided in the Sheboygan Metropolitan Planning Area, do not impose disproportionately high and adverse impacts on minority populations and/or low income populations. Furthermore, the benefits of the transportation improvements and services provided are reasonably distributed to serve the needs of all populations in the area. These statements are based on the analysis summarized in Appendix E of this 2020 - 2023 TIP.

#### **EXPEDITED PROJECT SELECTION PROCEDURES**

Federal regulations acknowledge that changes occur as TIP projects advance through the project development process. The regulations include some flexibility that MPOs may choose to implement to manage TIP amendment workload. The *WisDOT TIP Preparation Guidance* includes historic boilerplate language regarding these flexibilities that Wisconsin MPOs have included in their TIPs. FHWA reviewed the boilerplate language, and found some inconsistencies with current regulations. If MPOs choose to include permitted flexibility in implementing the TIP, then FHWA recommends that the TIP include the following specific section with commitment to the procedures outlined. If an MPO chooses not to include specific flexibilities, then the MPO should coordinate with WisDOT and FHWA to ensure that adopted expedited selection procedures remain compliant.

The Bay-Lake Regional Planning Commission/Sheboygan MPO, WisDOT, and the Sheboygan Parking and Transit Utility/Shoreline Metro hereby agree to the following procedures in advancing projects from the approved TIP for federal funding commitment:

- 1. The first year of the TIP constitutes an agreed to list of projects for project selection purposes and no further project selection action is required by the MPO for WisDOT or the transit operator to proceed with federal funding commitment.
- 2. Projects from the second, third or fourth year of the TIP can be advanced by WisDOT or the transit operator for federal fund commitment without further project selection action by the MPO.
- 3. Concerning the federal funding sources identified for individual projects in the TIP, it is agreed that WisDOT may unilaterally interchange eligible FHWA funding program sources without necessitating an amendment, subject to the project selection authority that federal regulations and state local program procedures reserve for the State and the MPO, and subject to reconciliation under Item #5.

- 4. WisDOT can unilaterally interchange FTA Section 5309, Section 5339 and Section 5307 capital funds in urbanized areas between 50,000 and 200,000 population without necessitating a STIP or TIP amendment. FTA should be notified of any interchange of funds.
- 5. To maintain accountability and fiscal constraint as changes occur during implementation of the TIP, the MPO, WisDOT and the transit operator will monitor projects in the TIP and account for all significant changes in scheduled years and costs in a TIP amendment at the midpoint of the calendar year. (MPOs on a two year TIP update cycle must also commit to "truing up" the TIP by amendment at the end of the first year along with declaring the second year of the TIP to be the agreed to list of projects for the second year of operation).
- 6. WisDOT relies on the public involvement process conducted by the MPO in the development of its TIP to satisfy the FTA program and planning requirements, as established for the Section 5309, Section 5339 and Section 5307 programs.

## TIP AMENDMENT GUIDELINES

#### **Major Amendments**

A major TIP amendment will be necessary when:

- Adding a non-exempt/expansion project to the first four years of the TIP, including advancing a project for implementation from an illustrative list or from the out year(s) of the TIP\*;
- Moving a non-exempt/expansion project out of the first four years of the TIP\*;
- Significantly changing the scope (character of work or project limits) of a non-exempt/ expansion project within the first four years of the TIP such that the current description is no longer accurate\*; or
- Adding or deleting any project that exceeds the lesser of 10 percent of the total original federal funding programmed for the calendar year, or \$1,000,000 (within the first four years of the TIP).
- \*For purposes of air quality conformity analysis, "non-exempt" projects are projects that change or modify capacity on the transportation network. Examples of "non-exempt" projects in the Sheboygan area might include adding or deleting lanes on an existing arterial or collector facility, building a new arterial or collector facility, or adding a new interchange to a freeway. Generally, most other projects are considered "exempt" projects for purposes of air quality conformity analysis. Additional information concerning these definitions can be found in the USEPA conformity regulation (40 CFR Part 93), specifically in Tables 2 and 3 of the regulation. This detailed information is available from MPO staff at the Bay-Lake Regional Planning Commission office.

A major amendment will require the following steps:

- Staff will commence the major amendment process by releasing the proposed amendment for a 30-day public review period. Staff will inform the public of the proposed major amendment by placing the proposed major amendment and public review period announcement on the Sheboygan MPO webpage of the Bay-Lake Regional Planning Commission website, by sending notices to the organizations on the MPO Public Participation Plan mailing list, and by publishing a notice in one or more local newspapers. The notices will be distributed just before the 30-day review period begins. Public notice will also be provided through social media, including the Bay-Lake Regional Planning Commission Facebook page and (more briefly) through Twitter.
- Near the end of the 30-day public review process, staff will conduct a public hearing on the major TIP amendment at an accessible location that can be reached by Shoreline Metro. The public hearing notice will also be sent to the organizations on the MPO Public Participation Plan mailing list and to local news media. MPO staff will consider holding the public hearing immediately before joint meetings of the Sheboygan MPO Technical and Policy Advisory Committees in order to conserve staff time and resources.
- Following the public hearing, the Sheboygan MPO Technical and Policy Advisory Committees will have the opportunity to comment on the proposed major TIP amendment and make a recommendation to the Bay-Lake Regional Planning Commission.
- Staff will present the proposed major amendment to the Bay-Lake Regional Planning Commission (or its Executive Committee) for final approval.

# Minor Amendments

A minor TIP amendment will be necessary when:

- Adding an exempt/system preservation project to the first four years of the TIP, including advancement of a project for implementation from an illustrative list or from the out year(s) of the TIP;
- Moving an exempt/system preservation project out of the first four years of the TIP;
- Changing the scope (character of work or project limits) of an exempt/system preservation project within the first four years of the TIP such that the current description is no longer reasonably accurate; or
- A change in project funding that impacts funding for other projects within the first four years of the TIP, forcing any exempt/system preservation project out of the first four years of the TIP.

A minor amendment will require the following steps:

• The Sheboygan MPO Technical and Policy Advisory Committees will have the opportunity to comment on the proposed minor TIP amendment and make a

recommendation to the Bay-Lake Regional Planning Commission; this will include a public comment period toward the beginning of the joint meeting of those committees.

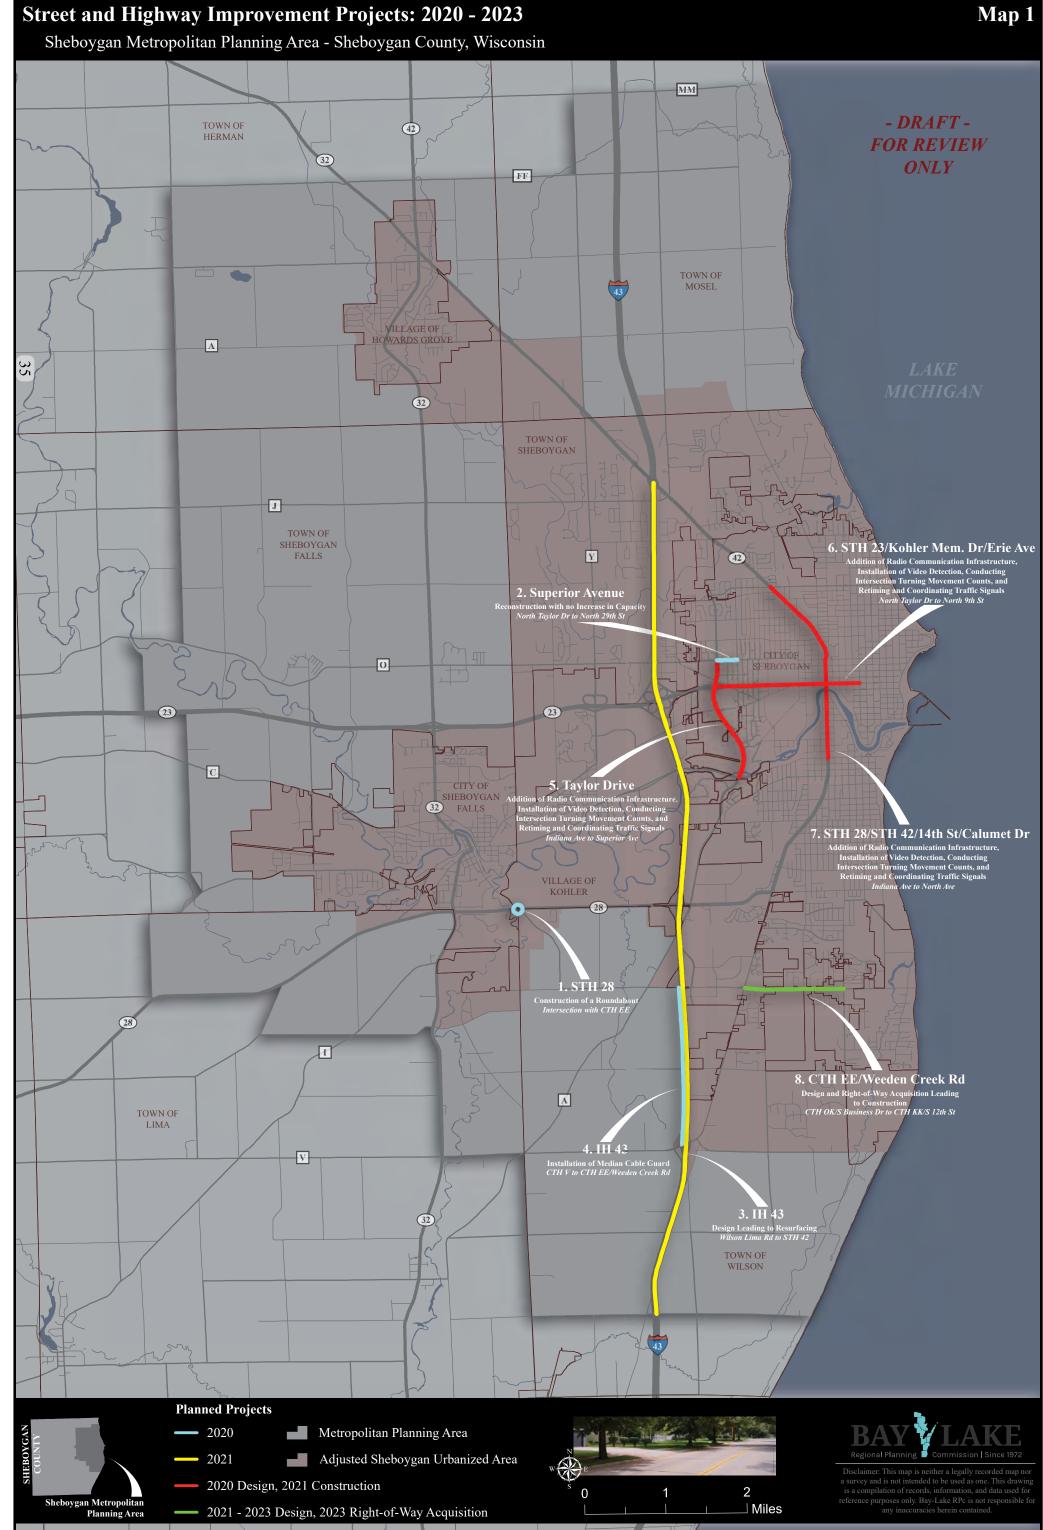

• Staff will present the proposed minor amendment to the Bay-Lake Regional Planning Commission (or its Executive Committee) for final approval.

# **Administrative Modifications**

The TIP can be administratively modified by staff without going through the amendment process under the following circumstances:

- Changing the implementation schedule for projects within the first four years of the TIP;
- Changes in scope (character of work or project limits) while remaining reasonably consistent with the approved project; or
- Changing the source (federal, state or local funding source); category (National Highway Performance Program, Surface Transportation Block Grant Program, earmarks, etc.); or amount of funding for a project without changing the scope of work or schedule for the project or any other project within the first four years of the TIP.

In addition, projects approved for Emergency Relief funding are not generally required to be included in the TIP. Therefore, any changes made for emergency relief projects may be considered administrative modifications to the TIP.

# APPENDIX B PROCEDURES FOR THE INVOLVEMENT OF PRIVATE ENTERPRISE IN TRANSIT PROGRAMS

# PROCEDURES FOR THE INVOLVEMENT OF PRIVATE ENTERPRISE IN TRANSIT PROGRAMS

In conformance with the FTA policy statements on private sector participation as published in the *Federal Registers* of October 22, 1984, and January 24, 1986, the following narrative is documentation of the Bay-Lake Regional Planning Commission's privatization efforts as Metropolitan Planning Organization for the Sheboygan Metropolitan Planning Area in Wisconsin.

1. The Sheboygan Metropolitan Planning Area Technical and Policy Advisory Committees are responsible for reviewing the major transportation plans and programs funded by the FTA and the FHWA. This includes review of projects selected for inclusion in the annual TIP or TIP Amendment for the Sheboygan Metropolitan Planning Area.

The Technical Advisory Committee is composed of local planning technicians and representatives of the Wisconsin Department of Transportation, the FHWA and the FTA. Membership on the Policy Advisory Committee is comprised of the chief elected officials from the local units of government within the metropolitan planning area. Private sector transportation providers receive notice of all meetings of both committees, and are invited to participate in these meetings, but do not sit as voting members of either committee.

- 2. An inventory of proprietary and private, non-profit providers of transportation services in the area is maintained and updated as necessary. This inventory includes existing school bus, commuter, charter, and intercity carriers as well as taxi and specialized (elderly/disabled) service providers.
- 3. All private enterprises included in the above inventory have been placed on the notification lists for development of the Bay-Lake Regional Planning Commission's annual transportation planning work program and for review of the transit portions of the draft TIP or TIP Amendment. In addition, agency personnel who may be aware of private providers not in our inventory will be added to the notification list.

Private providers have been invited to ask questions and provide comments on the planning and programming of projects. In addition, new and/or restructured transit service proposed in the TIP or TIP Amendment will be specifically enumerated in the review notice for that particular TIP or TIP Amendment. Private operators will be requested to notify the Bay-Lake Regional Planning Commission if they have any interest in receiving more information on the services or would like to be considered for providing one or more of the services.

With the notification, private providers are provided with the transit projects included in the <u>draft</u> Section 5307/5339 Program of Projects prepared by the Sheboygan Parking and Transit Utility (Shoreline Metro), as well as the list of Section 5310 applications.

- 4. The service requirements for new or expanded services being considered in the planning process will be specified and made available to private operators. Private proposals will be evaluated according to criteria which consider ability to provide the service and cost. Fully allocated costs will be the basis for comparison between public and private operators.
- 5. The Bay-Lake Regional Planning Commission is the designated clearinghouse for federally funded projects. While private operators have been included on the project notification list for transit projects in the past, a greater effort has been made to include all private operators in the review process. This will provide private operators with a greater opportunity to comment on Federal as well as state and local transportation projects.
- 6. Traditionally, the Bay-Lake Regional Planning Commission has provided technical assistance primarily to local public bodies and public agencies. This will be extended to private operators who request information or assistance with projects related to the transit planning program, as a part of the Commission's role in the coordination of the Technical and Policy Advisory Committees of the Sheboygan Metropolitan Planning Organization.

APPENDIX C AIR QUALITY CONFORMITY STATEMENT

# ASSESSMENT OF CONFORMITY OF THE UPDATE TO THE YEAR 2045 SHEBOYGAN AREA TRANSPORTATION PLAN (SATP) AND THE 2020 – 2023 SHEBOYGAN METROPOLITAN PLANNING AREA TRANSPORTATION IMPROVEMENT PROGRAM (TIP) WITH RESPECT TO THE STATE OF WISCONSIN AIR QUALITY IMPLEMENTATION PLAN

On March 26, 2019, the Bay-Lake Regional Planning Commission submitted an assessment of the conformity of the fiscally constrained Update to the *Year 2045 Sheboygan Area Transportation Plan (SATP)* and the *2019 – 2022 Sheboygan Metropolitan Planning Area Transportation Improvement Program (TIP)* with respect to the State of Wisconsin Air Quality Implementation Plan (SIP). Results from the regional emissions analysis attendant to that conformity assessment (with a few minor changes) can be found in Table C.1. The Update to the *Year 2045 SATP* and the *2019 – 2022 Sheboygan Metropolitan Planning Area TIP* were determined by the U.S. Department of Transportation, Federal Highway and Transit Administrations, to be in conformity with the 2008 eight-hour ozone National Ambient Air Quality Standard (NAAQS) for the Sheboygan County, Wisconsin, moderate (at the time) nonattainment area as well as with the 2015 eight-hour ozone NAAQS for the eastern Sheboygan County, Wisconsin, marginal nonattainment area, in a letter dated April 26, 2019.

The Bay-Lake Regional Planning Commission has now completed the preparation of the draft 2020 – 2023 Sheboygan Metropolitan Planning Area TIP. The draft 2020 – 2023 TIP can be found on the Bay-Lake Regional Planning Commission website at: https://baylakerpc.org/sheboygan-mpo/transportation-improvement-program-tip(.)

The 2020 - 2023 TIP is an update and extension of the previous 2019 - 2022 TIP (as amended), and is fully consistent with the Update to the Year 2045 SATP. The 2020 - 2023 TIP includes projects that should be initiated to implement the Update to the Year 2045 SATP, and no project is programmed in the 2020 - 2023 TIP which is not included in the Update to the Year 2045 SATP. The regional emissions analysis prepared for the Update to the Year 2045 SATP, which was approved on April 26, 2019, by the U.S. Department of Transportation, Federal Highway and Transit Administrations, applies to, and is consistent with, the proposed 2020 - 2023 TIP.

Therefore, the Bay-Lake Regional Planning Commission is requesting that the *Sheboygan Metropolitan Planning Area TIP: Calendar Years* 2020 - 2023 be determined to conform to the 2008 eight-hour ozone NAAQS for the Sheboygan County, Wisconsin, moderate nonattainment area and the 2015 eight-hour ozone NAAQS for the eastern Sheboygan County, Wisconsin, marginal nonattainment area. The regional emissions analysis performed and approved in 2019 on the fiscally constrained Update to the Year 2045 SATP and on the 2019 – 2022 TIP would generally be unchanged under this 2020 - 2023 TIP. The TIP includes the projects which must be started in the TIP's time frame in order to achieve the highway and transit systems envisioned in the Update to the *Year 2045 SATP*. All projects in the 2020 - 2023 TIP which are regionally significant are consistent with, and included in, the Update to the *Year 2045 SATP*. The design concept, scope, and schedule of each regionally significant project proposed in the 2020 - 2023 TIP is not significantly different from that described in the Update to the *Year 2045 SATP*.

*The 2018 budgets for Volatile Organic Compo	ounds and Nitrogen	Oxides are doct	amented in the	e "Attainment Pla	in for the Sheboy	gan County, Wi	sconsin, 8-Hour
Nonattainment Area" submitted by the Wise	consin Demartment	of Natural Reso	urces to USEI	PA in September of	f 2017. USEPA a	letermined that th	ne motor
vehicle emissions budgets in the plan were ad	dequate for transpo	rtation conformi	ty determinati	ions in January of	2018. The attain	ment plan preser	nts motor vehicle
emissions budgets for 2017 and 2018, but onl	y 2018 budgets wer	e used in the co	nformity analy	sis, since 2017 ha	d passed before	the conformity a	nalysis was
established. The budget established for vola	tile organic compou	nds was 1.4900	tons for 2018.	The budget esta	blished for nitrog	gen oxides was 2.	.9600 tons
for 2018.							
for 2018. Source: Wisconsin Department of Natural Res	sources, 2017 and 20	)19: and Bav-La	ke Regional P	lanning Commissi	on, 2019.		

The Bay-Lake Regional Planning Commission is aware that there will be a time in which new motor vehicle emission budgets (MVEBs) will be developed for the smaller nonattainment area for the 2015 8-hour ozone standard involving a portion of eastern Sheboygan County, and the travel demand forecast model will need to establish a domain that replicates this smaller area in order to demonstrate conformity in the future.

# APPENDIX D FINANCIAL CAPACITY ASSESSMENT OF SHORELINE METRO

# FINANCIAL CAPACITY ASSESSMENT OF SHORELINE METRO

The most recent Federal Transit Administration (FTA) financial capacity policy for transit systems receiving financial assistance from FTA was issued as Circular 7008.1A on January 30, 2002. In this and all subsequent years in which this policy is in force, the FTA will assess the financial capacity of applicants for federal capital and operating assistance. There are two elements of financial capacity which are evaluated by the FTA: (1) the general financial condition of the public transit grantee and its nonfederal funding entities; and (2) the financial capability of the public transit grantee and its nonfederal funding entities, including the ability of the grantee to fund current capital projects as well as ongoing operating needs. The FTA will determine the financial capacity of Shoreline Metro in the review of this TIP and during its triennial review process. In addition, the FTA may evaluate the financial capacity of Shoreline Metro if the following conditions exist:

- (1) If there are proposed major changes in transit service levels which create the need for major capital investment;
- (2) If major capital investment must be made to maintain existing service levels, affecting the financial health of the transit system; or
- (3) If there are disturbing trends in ridership, fare levels, operating costs and sources of public support.

In accordance with the requirements of FTA Circular 7008.1A, the Bay-Lake Regional Planning Commission, as the MPO for the Sheboygan Metropolitan Planning Area, has assessed the financial capacity of programmed operating and capital expenditures of Shoreline Metro. Interested readers are referred to Table D.1 for additional information on operating revenues and expenses (actual, estimated and projected) for the period between 2015 and 2023. Readers are also referred to Table D.2 for additional information concerning financial measures of effectiveness for Shoreline Metro for the period between 2015 and 2023. Detailed operating and capital expense information has also been analyzed in the preparation of several chapters of the *Sheboygan Transit Development Program (TDP)*, which is being updated in 2019 and early 2020. It is important to note that there were no negative comments concerning the financial condition of Shoreline Metro expressed in an FTA Triennial Review which took place on May 24 - 25, 2017.

Shoreline Metro discontinued the final hour of transit service on weekday evenings and reinstated the North and South Shuttles throughout the service day on Saturdays in late 2011. Shoreline Metro also consolidated Routes 1 North and 5 North into a single revised Route 5 North in late 2011. In addition, Shoreline Metro divided Route 10 into separate North and South routes in early 2012. Revisions were made to all other Shoreline Metro routes (with the exception of the North and South Shuttles) in late 2011 and early 2012. Revisions were also

2	015 to 2023	Shoreline N (In T	Table D.1 ine Metro Operating Exp (In Thousands of Dollars)	.1 ating Exper of Dollars)	Table D.1 2015 to 2023 Shoreline Metro Operating Expenses and Revenues (In Thousands of Dollars)	sə

made to several routes (particularly changes to Route 20 and all south side routes, with discontinuation of Route 30 and having other south side routes serve areas previously served by Route 30) in 2016. Minor adjustments to routes (particularly Route 20) took place in 2017. A day pass of \$3 was instituted in 2011. Fares are projected to remain stable through 2023 at this point.

Ridership decreased by nearly 1.9 percent between 2015 and 2016. Ridership increased by nearly 0.4 percent between 2016 and 2017. Ridership increased by over 13.2 percent between 2017 and 2018. Ridership is estimated to increase by over 10.9 percent between 2018 and 2019. The ridership decrease from 2015 to 2016 was due to low gas prices as well as making the transit operation more efficient, which minimized the need for transfers in some cases. The ridership increases from 2017 to 2019 are largely due to an agreement between Shoreline Metro and the Sheboygan Area School District (SASD) in which the SASD provides funding to Shoreline Metro (\$45,000 for the second half of 2018, \$90,000 in 2019, and continuation of the agreement assumed thereafter) in exchange for allowing SASD students and staff to ride free of charge on Shoreline Metro buses. Ridership is projected to remain at the estimated 2019 level in 2020, 2021, 2022 and 2023, presuming that no significant service cuts or fare increases are implemented.

Farebox revenues decreased by nearly 3.5 percent between 2015 and 2016. Farebox revenues increased by nearly 6.2 percent between 2016 and 2017. Farebox revenues decreased by over 13.4 percent between 2017 and 2018, and are estimated to decrease by over 9.0 percent between 2018 and 2019. Again, the farebox revenue decreases from 2017 to 2019 are largely due to an agreement between Shoreline Metro and the Sheboygan Area School District (SASD) in which the SASD provides funding to Shoreline Metro (\$45,000 for the second half of 2018, \$90,000 in 2019, and continuation of the agreement assumed thereafter) in exchange for allowing SASD students and staff to ride free of charge on Shoreline Metro buses. Farebox revenues are projected to remain at the estimated 2019 level in 2020, 2021, 2022 and 2023, again presuming that no significant service cuts or fare increases are implemented.

Minor adjustments in routing, promotional campaigns, and increases in service (where warranted) are among the efforts which have been made by Shoreline Metro over the past several years in order to increase ridership and revenues. There will be a continued backing of transit at the state level. There has also been support for Shoreline Metro in the communities which it serves; such support is expected to continue on the part of a majority of local decision makers in the years to come. However, this support needs to translate into additional subsidy for the transit operation, which may be difficult to accomplish at all levels of government given the federal deficit, difficulties in balancing the state budget, constraints on local budgets, and few state-authorized options outside the property tax for generating local revenues. There is a strong pro-efficiency movement among local officials in which Shoreline Metro and other city operations have been expected to become leaner and more efficient before receiving increases in municipal-level aids. Many capital acquisitions listed in this TIP are justified precisely with increased efficiency in mind.

In 2020, Shoreline Metro will replace the roof on its transit administration and maintenance facility using FTA Section 5339 funding and will replace one 35-foot fixed-route bus using funding from the Volkswagen Diesel Emissions Environmental Mitigation Trust. In 2023, Shoreline Metro will make various improvements at its transit administration and maintenance facility utilizing local funding. No transit capital projects have been programmed for 2021 or 2022, although two illustrative projects are listed in 2021 and 2022 in the 2020 - 2023 TIP, and could be programmed in the TIP if funding materializes. Shoreline Metro is encouraged to use its fleet in such a manner that large proportions of the fleet will not need to be replaced simultaneously. No major capital improvements are planned over the program period. Farebox revenues will be stable over the program period, and sources of combined public support will involve increases over the program period. Judging from this information, we find Shoreline Metro to have had a positive financial condition over the past four years, and that Shoreline Metro has the financial capacity to undertake the purchase of all capital items and maintain existing service levels which are programmed in this 2020 - 2023 Transportation Improvement *Program (TIP)*.

# APPENDIX E STATEMENT OF IMPACTS OF TIP PROJECTS ON ENVIRONMENTAL JUSTICE

# IMPACTS OF PROJECTS IN THE 2019 – 2022 TIP ON ENVIRONMENTAL JUSTICE

In 1994, *Executive Order 12898 – Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations* was issued. This Executive Order, accompanied by Title VI of the Civil Rights Act of 1964, attempts to identify, avoid and minimize disproportionately harmful or hazardous health and environmental effects on minority and low income populations. This Executive Order was issued in response to public concerns that everyone deserves equal protection under the law. Each federal agency, including the U.S. Department of Transportation (USDOT), was directed to make environmental justice a part of its mission.

In 1997, the U.S. Department of Transportation issued *DOT Order to Address Environmental Justice in Minority Populations and Low Income Populations*. According to the USDOT, there are three fundamental principles at the core of environmental justice:

- To avoid, minimize or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects, on minority populations and on low income populations;
- To ensure the full and fair participation by all potentially affected communities in the transportation decision making process; and
- To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low income populations.

Maps E.1, E.2 and E.3 illustrate the census block groups with above average minority and/or low income populations. All of these census block groups are located wholly or partially in the City of Sheboygan. Portions of census block groups 3.3, 4.2 and 10.2 are located in the Town of Sheboygan.

All analysis was done at the block group level. Minority and low income population data were collected from the 2013 - 2017 American Community Survey 5-Year Estimates. The Decennial Census no longer has a "long form" that asks economic and other detailed questions.

# Street and Highway Projects and their Impacts on Environmental Justice Target Areas

Street and highway projects affecting census block groups with above average minority and/or low income populations are shown in Map E.1; this map only shows programmed street and highway projects during the period covered by this TIP, and does not include WisDOT level of effort projects. The following projects are within or along the boundary of census block groups with above average minority and/or low income populations:

• Project #3: Interstate Highway 43 from Wilson Lima Road to State Highway 42: Design in 2020 Leading to Resurfacing (the project is on the western edge of a census block group with a high minority population);

- Project #5: Taylor Drive from Indiana Avenue to Superior Avenue: Design in 2020 and Addition of Radio Communication Infrastructure, Installation of Video Detection, Conducting Intersection Turning Movement Counts, and Retiming and Coordinating Traffic Signals in 2021 (the project bisects a census block group with a high minority population between the north approach of the Taylor Drive bridge and Kohler Memorial Drive);
- Project #6: State Highway 23/Kohler Memorial Drive/Erie Avenue from North Taylor Drive to North 9<sup>th</sup> Street: Design in 2020 and Addition of Radio Communication Infrastructure, Installation of Video Detection, Conducting Intersection Turning Movement Counts, and Retiming and Coordinating Traffic Signals in 2021 (the project takes place along four environmental justice target areas, including: one (1) census block group with a high minority population located south of the project extent between Taylor Drive and the Union Pacific Railroad just east of North 18<sup>th</sup> Street; one (1) census block group with a very high population below the poverty level located south of the project extent between the Union Pacific Railroad and North 9<sup>th</sup> Street; one (1) census block group with a very high minority population and a high population below the poverty level located north of the project extent between the Union Pacific Railroad and North 9<sup>th</sup> Street; and one (1) census block group with a high minority population and a high Street; and one (1) census block group with a high minority population and a high minority population and a high population below the poverty level located north of the project extent between North 13<sup>th</sup> Street; and North 9<sup>th</sup> Street); and
- Project #7: State Highway 28/State Highway 42/14<sup>th</sup> Street/Calumet Drive from Indiana Avenue to North Avenue: Design in 2020 and Addition of Radio Communication Infrastructure, Installation of Video Detection, Conducting Intersection Turning Movement Counts, and Retiming and Coordinating Traffic Signals in 2021 (the project takes place within or along the border of five environmental justice target areas, including: one (1) census block group with a very high minority population and a very high population below the poverty level which is bisected by the project between Indiana Avenue and the southern approach to the 14<sup>th</sup> Street bridge; one (1) census block group with a very high population below the poverty level which is bisected by the project between the northern approach of the 14<sup>th</sup> Street Bridge to Erie Avenue; one (1) census tract with a very high minority population and a high population below the poverty level which is bisected by the project between Erie Avenue and Saemann Avenue; one (1) census tract with a very high population below the poverty level and a very high minority population located northeast of the project extent between Saemann Avenue and Geele Avenue; and one (1) census tract with a high minority population which is bisected by the project between Geele Avenue and North Avenue).

One of the above noted projects is a system preservation project, while three of these are system improvement projects that are expected to improve the quality and safety of the existing street and highway network. None of the above noted projects involves additional capacity.

# **Bicycle and Pedestrian Transportation Projects and their Impacts on Environmental** Justice Target Areas

Bicycle and pedestrian transportation projects affecting census block groups with above average minority and/or low income populations are shown in Map E.2; this map only shows programmed projects involving construction during the period covered by this TIP, and does not include projects involving educational/promotional efforts or level of effort projects, nor does it include projects where impacts cannot reasonably be mapped. Some projects that cannot be mapped will benefit residents in environmental justice target areas.

One (1) bicycle and pedestrian transportation project shown in Map E.2 touches environmental justice target areas, as follows:

• Project #1: County Highway PP: Sheboygan River Bridge to South 24<sup>th</sup> Street: Design in 2020 and Conversion into a Linear Parkway and Trail Facility in 2021 (this project touches a census block group with a high minority population to the west and touches another census block group with a very high minority population to the east).

The above noted project and all projects outside environmental justice target areas are expected to benefit minority and low income populations throughout the metropolitan planning area.

# Transit Projects and their Impacts on Environmental Justice Target Areas

Map E.3 shows the route structure of Shoreline Metro in comparison to environmental justice target areas within the metropolitan planning area. All of the residential portions of the targeted census block groups located within the metropolitan planning area are currently served by transit. The transit service provided allows residents of the targeted census block groups to reach nearly all major destinations (such as major employment centers, entertainment and recreation venues, government services, health care, schools and shopping centers) in 30 minutes or less. When using transit, most residents need to walk no more than three to five blocks to reach their bus stop or destination.

# TIP Projects and Direct and Indirect Impacts on Minority and/or Low Income Populations

Taken as a whole, the projects in this 2020 – 2023 TIP, together with the other public and privately funded transportation improvements and services provided in the Sheboygan Metropolitan Planning Area, do not impose disproportionately high and adverse impacts on minority populations and/or on low income populations. In addition, the benefits of the transportation services and improvements proposed are reasonably distributed to serve the mobility and accessibility needs of all population groups (and particularly of minority and/or low income populations) within the Sheboygan Metropolitan Planning Area. These statements are based on the analysis of proposed projects, their locations, and impacts on both minority and low income populations as summarized in this appendix to the TIP.

Additional environmental justice analysis can be found in Appendix E of the Update to the *Year* 2045 Sheboygan Area Transportation Plan (SATP) approved in April of 2019.

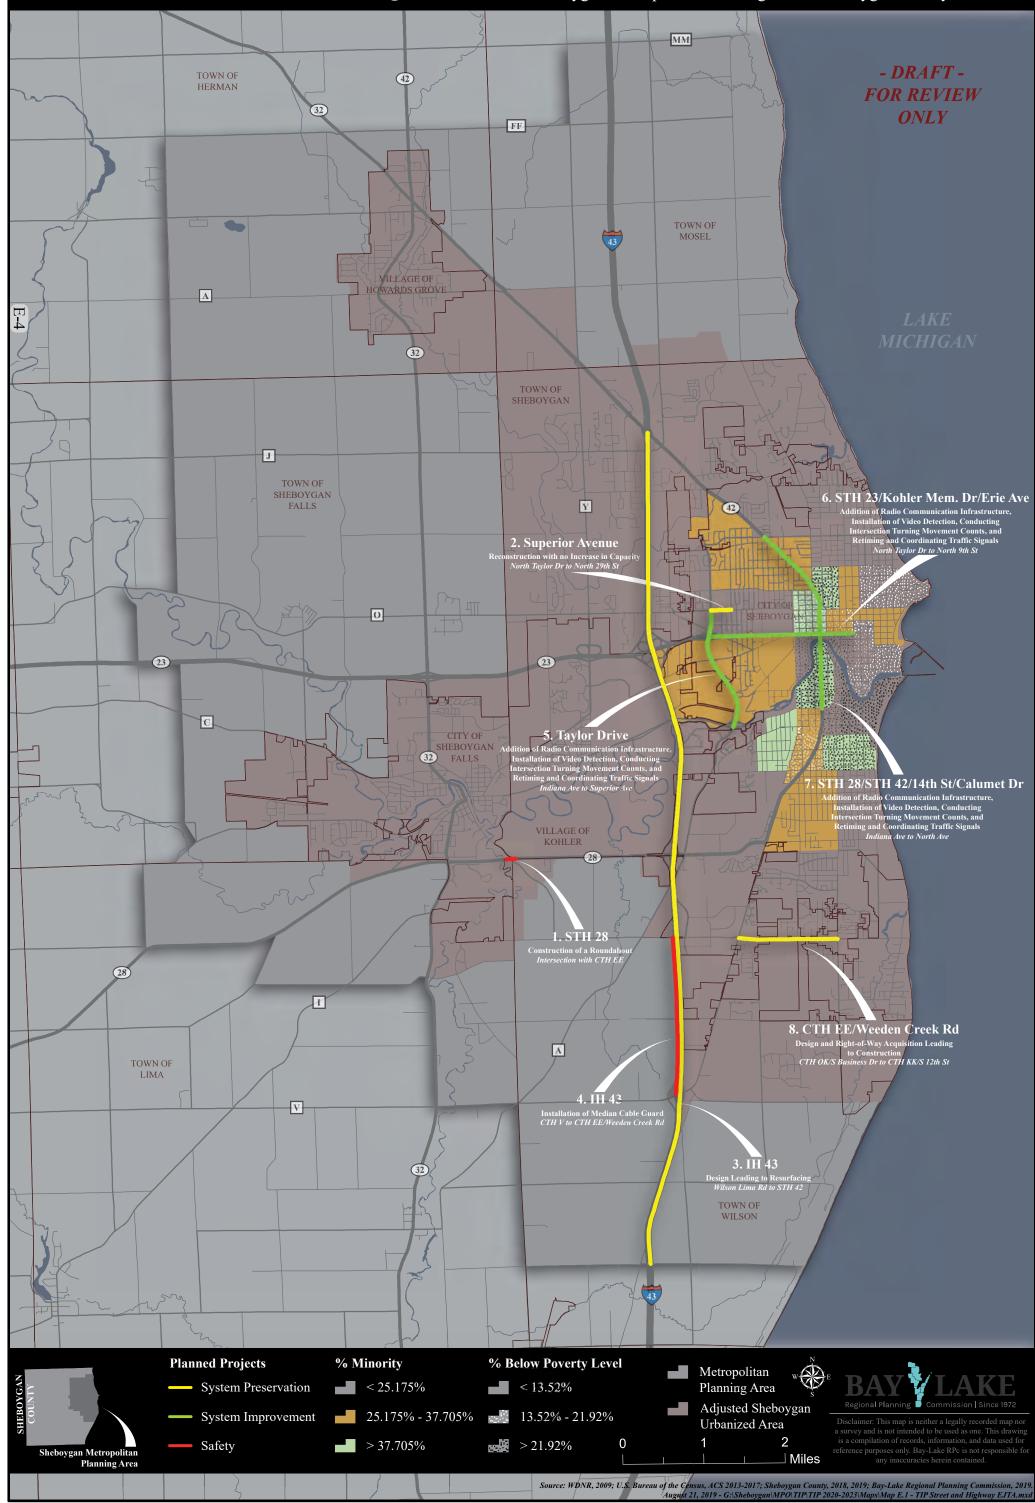

# Public Involvement of Minority and Low Income Populations

Attempts to involve minority and low income populations in the development of this TIP can be found in the *Public Participation Process* section within the main body of this 2020 – 2023 TIP.

# APPENDIX F MPO APPROVAL OF TIP

#### **RESOLUTION 10-2019**

Resolution of the Bay-Lake Regional Planning Commission approving the Sheboygan Metropolitan Planning Area Transportation Improvement Program (TIP): Calendar Years 2020 – 2023, determining air quality conformity for the Update to the Year 2045 Sheboygan Area Transportation Plan (SATP) and its implementing 2020 – 2023 TIP, and certifying the Metropolitan Transportation Planning Process for the Sheboygan Metropolitan Planning Area

WHEREAS, the Bay-Lake Regional Planning Commission is the officially designated Metropolitan Planning Organization (MPO) for metropolitan transportation planning in the Sheboygan Metropolitan Planning Area; and

WHEREAS, U.S. Department of Transportation regulations provide for self-certification that the metropolitan transportation planning process is being carried out in conformance with all applicable requirements of federal law; and

WHEREAS, metropolitan transportation planning, including the preparation of Transportation Plans and Transportation Improvement Programs (TIPs) or TIP Amendments, is required of metropolitan planning areas and by federal statutes and regulations within the purview of the U.S. Department of Transportation, including Title 23 of the U.S. Code, Section 134 (and its implementing regulation, 23 CFR 450(c), as amended), and Title 49, U.S. Code (Federal Transit Act, as amended); and

WHEREAS, the Update to the *Year 2045 SATP* was adopted by the Bay-Lake Regional Planning Commission in April 2019 following a plan preparation effort involving public outreach and numerous meetings of the Sheboygan MPO Technical and Policy Advisory Committees; and

WHEREAS, a specific air quality conformity analysis was undertaken with respect to the 2008 8-hour moderate ozone nonattainment area that covers all of Sheboygan County and the 2015 8-hour marginal nonattainment area that covers much of eastern Sheboygan County (including much of the Sheboygan Metropolitan Planning Area), with the result that the Update to the *Year 2045 SATP* and its implementing *2020 – 2023 TIP* have been determined to conform to the existing State of Wisconsin implementation plan for the achievement and maintenance of national ambient air quality standards, as required by the federal Clean Air Act Amendments of 1990 and their implementing regulations; and

WHEREAS, citizen input was received on the 2020 – 2023 TIP through a public participation process which included a public comment period and public hearing, as well as public meetings of the Sheboygan MPO Technical and Policy Advisory Committees, and which otherwise conformed to provisions for TIP development in the 2016 update to the Sheboygan MPO Public Participation Plan; and

WHEREAS, the 2020 – 2023 TIP for the Sheboygan Metropolitan Planning Area was reviewed (and modified, where necessary) by professionals and by elected officials representing municipalities in the Sheboygan Metropolitan Planning Area as well as by private sector transportation providers before subsequently being recommended for approval by the Sheboygan MPO Technical and Policy Advisory Committees at their joint meeting on October 24, 2019.

#### NOW, THEREFORE BE IT RESOLVED:

<u>FIRST</u>: That the Bay-Lake Regional Planning Commission approves the *Sheboygan Metropolitan Planning Area Transportation Improvement Program (TIP): Calendar Years 2020 – 2023* as being compatible with existing transportation plans and programs in the Sheboygan Metropolitan Planning Area.

<u>SECOND</u>: That the Bay-Lake Regional Planning Commission determines that the Update to the *Year 2045 SATP* and its implementing 2020 – 2023 TIP for the Sheboygan Metropolitan Planning Area conform to the State of

Wisconsin Implementation Plan for the achievement and maintenance of national ambient air quality standards, as required by the federal Clean Air Act Amendments of 1990 and their implementing regulations.

<u>THIRD</u>: That the Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, and in accordance with 23 CFR 450.334(a), hereby certifies that the metropolitan transportation planning process is addressing major issues facing the Sheboygan Metropolitan Planning Area, and is being conducted in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
- (2) Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR Part 93;
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR Part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (5) Section 1101 (b) of the "Fixing America's Surface Transportation (FAST)" Act (Pub. L. 114-357) and 49 CFR Part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
- (6) 23 CFR Part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et. seq.) and 49 CFR Parts 27, 37 and 38;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of Title 23, U.S.C., regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR Part 27 regarding discrimination against individuals with disabilities.

<u>FOURTH</u>: That the Bay-Lake Regional Planning Commission certifies that the 2020 - 2023 TIP for the Sheboygan Metropolitan Planning Area contains only projects that are consistent (in scope, termini and the implementation schedule) with the Update to the Year 2045 SATP.

<u>FIFTH:</u> That the Bay-Lake Regional Planning Commission endorses the continuation of the urban transportation planning process in the Sheboygan Metropolitan Planning Area.

Dan Koski, Chairperson Bay-Lake Regional Planning Commission

ATTEST:

I, Terry Brazeau, Secretary-Treasurer of the Bay-Lake Regional Planning Commission, hereby certify that the above is a true copy of a resolution adopted by the Bay-Lake Regional Planning Commission on the 25<sup>th</sup> day of October, 2019.

Terry Brazeay, Secretary-Treasurer Bay-Lake Regional Planning Commission

# APPENDIX G SURFACE TRANSPORTATION BLOCK GRANT (STBG) URBAN PROJECT PRIORITIZATION POLICY

# SURFACE TRANSPORTATION BLOCK GRANT (STBG) URBAN PROJECT PRIORITIZATION POLICY: TRANSPORTATION IMPROVEMENT PROGRAMS: SHEBOYGAN URBANIZED AREA

#### As Revised: Effective November 1, 2014

#### I. Surface Transportation Block Grant (STBG) Urban Project Eligibility

Street and highway construction projects on arterial and collector routes within the Sheboygan Urbanized Area, transit capital projects and transportation alternatives projects in the Sheboygan Urbanized Area, in general, are eligible for STBG Urban project funding. The following are guidelines which shall be used by the MPO in determining whether street and highway construction, transit capital and transportation alternatives projects have sufficient priority to be included as STBG Urban eligible projects in a Transportation Improvement Program (TIP):

- A. The costs of feasibility studies are not eligible for STBG Urban project funding. However, engineering or design costs are eligible for funding.
- B. Right-of-way acquisition costs are eligible for STBG Urban project funding. However, such right-of-way acquisition must meet all state and federal guidelines.
- C. Isolated traffic signal installation projects are not eligible for STBG Urban project funding. However, applicants for such projects are encouraged to apply for funding under the Highway Safety Improvement Program (HSIP).
- D. Railroad crossing projects are not eligible for STBG Urban project funding unless they are part of an STBG Urban eligible project.
- E. The sponsoring local government or governments is (or are) required to present evidence from their Capital Improvement Program indicating financial commitment to the local share of the project if funded, and also must submit a WisDOT project worksheet to the MPO and to the WisDOT Northeast Region office by the deadline established by the MPO for the upcoming biennium.

#### II. <u>Project Level Tests of STBG Urban Project Eligibility</u>

The following tests of eligibility must be satisfied before a project can proceed to the prioritization categories:

A. The project must be submitted by a local jurisdiction for inclusion in an upcoming Transportation Improvement Program (TIP). In addition, the overall TIP must be in conformity with the Wisconsin Department of Natural Resources' State Implementation Plan (SIP) for Air Quality, as required by the Clean Air Act Amendments (CAAA) of 1990.

- B. The project must appear as a recommendation in the Sheboygan Area Transportation Plan (SATP), in its various components. If the project is not in the SATP, the SATP must be amended to include the project.
- C. Engineering and design are eligible costs under this program. However, preliminary engineering must be completed before a project may be eligible for construction funding. Evidence of cost estimates based on completed preliminary engineering for the project must be attached to the WisDOT project worksheet.

#### III. Special Conditions of the Prioritization Process

Alternate financing sources should be used whenever possible before considering STBG Urban funds to finance a project. Examples of such alternate financing sources for street and highway improvements include the National Highway Performance Program (for bridges on the National Highway System network), STBG non-urban funds (for bridges off the NHS network), the state Transportation Economic Assistance (TEA) program, the Congestion Management and Air Quality (CMAQ) improvement program, the HSIP program, and the Local Roads Improvement Program (LRIP). Examples of such alternate financing sources for transit capital improvements include the FTA Section 5307 and Section 5339 programs and the CMAQ program. Examples of such alternate financing sources for transportation alternatives set-aside and the CMAQ program.

Federal funding participation for any project in this program cannot be more than 80 percent of total project costs. In an effort to make federal participation worth the paperwork involved with any project financed by state and/or federal funds, the MPO has established a 50 percent minimum for federal participation on most projects. Exceptions can be made for high-cost projects which are expected to utilize more than half the federal STBG Urban project allotment made to the Sheboygan Urbanized Area in any given funding period.

#### IV. STBG Urban Project Prioritization Criteria

The criteria in this section shall be used to evaluate STBG Urban eligible projects in order to establish priorities based on need. These criteria include current or potential demand, importance of the facility in the urban transportation system, and condition of the facility, corridor, vehicle or equipment. Overall score determines the priority of all eligible projects, with the highest score receiving top priority in each project category.

A. Current or Potential Demand. This is an indicator of capacity problems with a street or highway, transit vehicle or bicycle or pedestrian facility. In the case of street or highway improvements to existing facilities, a higher volume-to-capacity ratio receives a higher score. In the case of new streets or highways, a volume-to-capacity ratio close to 0.70 receives a higher score. The projected "no build" volume-tocapacity ratios under the recommended growth scenario calculated for the current SATP will be applied in determining the volume-to-capacity ratios under the "recommended plan" and the recommended growth scenario calculated for the current SATP will be applied in determining the volume-to-capacity ratios for mew streets or highways under this criterion.

In the case of transit vehicle improvements, a higher vehicle load factor receives a higher score. The vehicle load factor for a specific route will be used when transit

vehicle improvements can be attributed to that route. Otherwise, a systemwide vehicle load factor will be used to evaluate transit vehicle improvements. In the case of other transit capital improvements, a score of 5 will be assigned to such improvements.

In the case of transportation alternatives, a large amount of potential use on a typical summer day by bicyclists, pedestrians and other non-motorized traffic receives a higher score.

B. Importance of the Facility in the Urban Transportation System. This is an indicator of an existing or planned street or highway, transit vehicle or capital improvement or transportation alternative in the transportation system of the Sheboygan Urbanized Area. In the case of existing or planned street or highway improvements, this criterion gives priority to the improvement of principal arterial routes over minor arterial routes, and of minor arterial routes over collector routes.

In the case of transit vehicle or capital improvements, the transit director will prioritize transit vehicle or other transit capital improvements being considered for STBG Urban project funds into six tiers assigned points as described below. Transit capital STBG Urban candidate projects will be limited based on agency need and available funding.

In the case of transportation alternatives, consistency with recommendations made in the most current *Sheboygan County Pedestrian and Bicycle Comprehensive Plan* determines the importance of the facility in the urban transportation system as described below. Transportation alternatives which do not provide directly for bicycle, pedestrian or other non-motorized transportation purposes are assigned one point under this criterion.

#### ALL STREET OR HIGHWAY IMPROVEMENTS

C. *Condition.* An indicator of the degree to which pavements, vehicles, equipment, or corridors for bicyclists and pedestrians are deficient in project areas where STBG Urban funds are being considered in the TIP process. A higher score means that the pavement, transit capital item, bicycle corridor or pedestrian corridor is in poorer condition. Pavement Management Systems will be utilized in determining the pavement condition of existing streets and highways examined under this policy. In the City of Sheboygan, the pavement management system maintained by the city Department of Public Works will be utilized to evaluate the pavement deficiencies of streets and highways involving candidate projects, then converted to a score equivalent to the PASER pavement management system. The PASER system will be used to evaluate the pavement condition of all other candidate STP Urban projects in the Sheboygan Urbanized Area. All new streets and highways shall be assigned an automatic ten points under this criterion.

In the case of transit vehicle or capital improvements, existing vehicle or equipment age, useful life of the vehicle or equipment as determined by FTA, and physical condition of the existing vehicle or equipment or conditions leading to the need for additional vehicles or equipment will be considered in determining the condition of vehicles and equipment examined under this policy. In the case of transportation alternatives, the *Guide for the Development of Bicycle Facilities* and the *Guide for the Planning, Design and Operation of Pedestrian Facilities* (both of which are produced by the American Association of State Highway and Transportation Officials, or AASHTO) will be used in determining the condition of corridors for bicyclists and pedestrians.

D. *Multimodalism.* This criterion evaluates whether a candidate project includes alternatives to single occupancy vehicle transportation. This can include transit and non-motorized transportation (including bicycle and pedestrian travel). Examples include newly constructed or reconstructed sidewalks, roadways with appropriate bearing capacity for buses, bus loading zones, bus lanes and construction of lanes with adequate widths for bicycles. Projects must serve as general use to the public. Projects which incorporate alternative facilities that primarily serve a transportation purpose rather than a recreational purpose will receive higher priority. Transit and most transportation alternative projects will receive 1, 3 or 5 points, depending on the number of alternate modes which they ultimately serve.

#### ALL PROJECTS Number of Alternate Modes Served Points Adds Three Alternate Modes 5 3 Adds Two Alternate Modes Adds One Alternate Mode 1 Adds No Alternate Modes 0 Deletes One Alternate Mode -1 Deletes Two Alternate Modes -3 -5 **Deletes** Three Alternate Modes

E. *Transportation Safety*. This criterion is based on an assessment of existing safety problems and the extent to which the proposed project will reduce such problems. Crash statistics and standards should be used when considering street and highway projects, while more qualitative safety aspects should be considered for bicycle and pedestrian transportation projects and for transit capital projects. In addition, this criterion emphasizes a goal of eliminating or minimizing corridor or intersection safety problems on the system. In the case of street and highway projects, alternative ratings are available by project type based on segment crash rates, high accident intersection locations and new facilities.

#### Street and Highway Improvement Projects

In the case of street and highway improvement projects, alternative ratings are available by project type based on segment crash rates, high accident intersection crash rates, and new facilities.

#### Segment Crash Rates

WisDOT determines average crash rates per 100 million vehicle miles traveled by facility type or functional classification. These crash rates can be determined for mid-block segments of urban streets.

Crash Rate	Score
280 or more	5
150 to 279	3

#### APPENDIX H TRANSITION IN PROGRAMMING FROM MAP-21 TO FAST ACT FUNDING PROGRAMS

## TRANSITION IN PROGRAMMING FROM MAP-21 TO FAST ACT FUNDING PROGRAMS

The FAST Act made modest changes to the Federal-aid Highway funding programs established in MAP-21. MAP-21 significantly changed the SAFETEA-LU and prior highway funding programs.

The biggest FAST Act change was to retitle the former Surface Transportation Program (STP) to the Surface Transportation Block Grant Program (STBG) while basically retaining all of the historic subprograms, which distribute funding based on population groups. TIPs typically showed STP funding broken out by the urban funding administered by the MPOs and STP-Flex or Other for the flexible funding program administered by WisDOT. These former STP program funds should now be shown as STBG with the corresponding urban-flex breakout.

The stand-alone MAP-21 Transportation Alternatives Program (TAP) was pulled under the STBG program as a set-aside, similar to the former Transportation Enhancements program. WisDOT continues to administer the Transportation Alternatives set-aside as a separate program. Funding can be shown as TA or STBG-TA in the TIPs.

The stand-alone Bridge Program was eliminated in MAP-21. WisDOT continues to administer the bridge program separately from the more general highway improvement programs, but the federal source of funding for bridge improvement projects comes from either the NHPP for projects on the NHS or STBG. The WisDOT Region offices should work with their respective MPOs to provide the current federal-aid highway program (NHPP or STBG) associated with bridge projects.

FAST Act Funding Program	Associated Prior Act Funding
NHPP (National Highway Performance Program)	<u>Programs</u> IM, NHS, BR (on the NHS)
STBG (Surface Transportation Block Grant Program)	STP, BR (not on the NHS), TAP, TE, SRTS Subcategorization for urban, flex, bridge, TA
HSIP (Highway Safety Improvement Program)	HSIP
HSIP-RR (Rail-Highway Grade Crossing Set-aside)	HSIP-RR
CMAQ (Congestion Mitigation & Air Quality Improvement Program)	CMAQ

#### APPENDIX I PERFORMANCE MEASURES IN THE SHEBOYGAN METROPOLITAN PLANNING AREA TIP

#### PERFORMANCE MEASURES IN THE SHEBOYGAN METROPOLITAN PLANNING AREA TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

#### **Introduction**

As part of recent federal transportation legislation (MAP-21 and the FAST Act), it is a requirement to incorporate performance-based planning and programming into the development of Metropolitan Planning Organization (MPO) Long-Range Transportation Plans (LRTPs) and Transportation Improvement Programs (TIPs). The Statewide and Nonmetropolitan Transportation Planning; Metropolitan Transportation Planning; Final Rule further defined that the TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the 23 CFR 490 performance measure targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets (23 CFR 450.326(d)).

Federal funding is provided for a wide range of transportation-related activities, including projects on higher function local streets and highways not on the State Trunk Highway system, and local safety improvements. These programs are funded through the federal "Fixing America's Surface Transportation" (FAST) Act.

23 USC 150: National performance measure goals are:

- **Safety** To achieve a significant reduction in traffic fatalities and serious injuries on all public roads;
- **Infrastructure Condition** To maintain the highway infrastructure asset system in a state of good repair;
- **Congestion Reduction** To achieve a significant reduction in congestion on the National Highway System;
- System Reliability To improve the efficiency of the surface transportation system;
- Freight Movement and Economic Vitality To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development;
- **Environmental Sustainability** To enhance the performance of the transportation system while protecting and enhancing the natural environment; and
- **Reduced Project Delivery Delays** To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

More information on the national performance measure goals can be found at the Federal Highway Administration (FHWA) website link listed below:

https://www.fhwa.dot.gov/tpm/about/goals.cfm

MAP-21/FAST Act Performance Measures (as established in 49 USC 625 and 23 CFR 490) are:

- Transit
  - Rolling Stock: The percentage of revenue vehicles (by type) that exceed the useful life benchmark (ULB)
  - Equipment: The percentage of equipment that exceeds the ULB
  - Facilities: The percentage of facilities (by group) that are rated less than 3.0 on the Transit Economic Requirements Model (TERM) Scale
  - Infrastructure: The percentage of track segments (by mode) that have performance restrictions. Track segments are measured to the nearest 0.01 of a mile. (This performance measure does not apply to the Sheboygan Metropolitan Planning Area)
- Safety
  - o Number of fatalities
  - Fatalities per 100 million vehicle miles traveled
  - Number of serious injuries
  - o Serious injuries per 100 million vehicle miles traveled
  - o Number of non-motorized fatalities and non-motorized serious injuries
- Infrastructure
  - o Percentage of pavements on the Interstate System in Good Condition
  - o Percentage of pavements on the Interstate System in Poor Condition
  - Percentage of pavements on the non-Interstate National Highway System (NHS) in Good condition
  - o Percentage of pavements on the non-Interstate NHS in Poor condition
  - Percentage of NHS bridges classified as in Good condition
  - Percentage of NHS bridges classified as in Poor condition
- System Performance on the NHS
  - Interstate Travel Time Reliability Measure: Percent of person-miles traveled on the Interstate that are reliable
  - Non-Interstate NHS Travel Time Reliability Measure: Percent of person-miles on the non-Interstate NHS that are reliable
- Freight Movement
  - o Freight Reliability Measure: Truck Travel Time Reliability (TTTR) Index

- CMAQ Congestion Reduction
  - Peak Hour Excessive Delay (PHED) Measure: Annual Hours of PHED Per Capita (This performance measure does not apply to the Sheboygan Metropolitan Planning Area)
  - Non-Single Occupancy Vehicle (SOV) Travel Measure: Percentage of Non-SOV Travel (This performance measure does not apply to the Sheboygan Metropolitan Planning Area)
  - o Emissions Measure: Total Emission Reductions

#### Sheboygan MPO Performance-Based Planning and Programming Processes

#### Long-Range Transportation Plan

The Bay-Lake Regional Planning Commission, as the designated MPO for the Sheboygan Metropolitan Planning Area, has been using performance measures in its planning process for several years. The Update to the *Year 2045 Sheboygan Area Transportation Plan (SATP)* addressed performance measures as a new requirement as a part of the federal MAP-21 transportation legislation, which continued in the FAST Act. MPO staff has been tracking and updating data on an annual basis or as it becomes available. The national performance measure goals identified in the introduction have been incorporated into the policies and performance measures monitored in the Update to the *Year 2045 SATP*. The Update to the *Year 2045 SATP* was approved on April 26, 2019, and can be viewed at the following page on the Sheboygan MPO website:

https://baylakerpc.org/sheboygan-mpo/long-range-transportation-planning/year-2045-sheboygan-area-transportation-plan-satp

The Update to the Year 2045 SATP involved a performance-based planning process.

#### **Transportation Improvement Program (TIP)**

The Sheboygan MPO has always used appropriate scoring criteria for ranking and selecting projects for the Surface Transportation Block Grant (STBG) – Urban program in the TIP. The ranking criteria for this federal program use scoring systems that are tied to goals and policies in the Update to the *Year 2045 SATP*. The TIP evaluates short-range projects based on criteria that include: plan consistency, current or potential demand (capacity needs), functional classification (including traffic volume within two of the classifications), pavement condition, multimodalism, and safety. Transit improvements and bicycle and pedestrian transportation improvements also have parallel criteria which allow projects in these categories to compete for funding. While not officially included as a criterion, preservation of existing systems has been emphasized in the project selection process over past funding cycles. Projects are scored based on a set number of points for each criterion, resulting in a project ranking and recommendation list for STBG – Urban projects in the TIP. The *Sheboygan Metropolitan Planning Area TIP: Calendar Years 2020 – 2023* was approved on October 25, 2019, and it, along with any amendments to that document, can be viewed at the following page on the Sheboygan MPO website:

https://baylakerpc.org/services/transportation/sheboygan-mpo/sheboygan-metropolitan-planningarea-transportation-improvement-program-tip

#### Sheboygan MPO Performance Measures

According to the requirement for the federal performance measure management process, targets are set for national performance measures on a schedule based on when the measures were finalized. In this case, the Wisconsin Department of Transportation (WisDOT) must report to the U.S. Department of Transportation (USDOT) on the progress in achieving the targets for each measure. WisDOT sets its performance measure targets first (in coordination with the MPOs), and then, the MPOs can choose to either set their own targets or support the targets that WisDOT has adopted (or a combination thereof) within 180 days of WisDOT setting its targets. In Wisconsin, for most performance measure targets, most MPOs have chosen to follow and support WisDOT and its targets.

#### **Transit Asset Management Targets**

The U.S. Department of Transportation established four performance measures for transit asset management (TAM). The Sheboygan MPO worked with the one transit operator in the Sheboygan Metropolitan Planning Area (Shoreline Metro) to establish targets for three of the four measures (rolling stock, equipment and facilities; infrastructure only relates to rail transit, which does not exist locally). A 2019 TAM Plan was developed for Shoreline Metro in the process of setting these targets, and covers the period from October 1, 2019, through September 30, 2020. The Sheboygan Transit Commission approved the targets for Shoreline Metro on October 22, 2019. The Sheboygan MPO Technical and Policy Advisory Committees recommended approval of the targets for the MPO at their September 5, 2019, joint meeting. The Bay-Lake Regional Planning Commission approved the targets for the Sheboygan MPO on September 13, 2019. The TAM targets are:

- Rolling Stock: The percentage of revenue vehicles (by type) that exceed the useful life benchmark (ULB). This target allows for <u>28 percent</u> of revenue vehicles and <u>0 percent</u> of non-revenue vehicles to pass beyond useful life.
- Equipment: The percentage of equipment that exceeds the ULB In the case of Shoreline Metro, "equipment" was characterized as the most significant equipment, or non-vehicle items with a replacement value of \$50,000 or more. These items include a scrubber, a hoist and a bus wash, all located at the Shoreline Metro bus garage. This target allows for **100 percent** of Shoreline Metro's most significant equipment to pass beyond its useful life.
- Facilities: The percentage of facilities that are rated less than 3.0 on the Transit Economic Requirements Model (TERM) Scale. Shoreline Metro's facilities include: its administration, maintenance and storage facility (bus garage), and its transfer facility/station. This target allows for <u>50 percent</u> of facilities to pass beyond useful life.
- Infrastructure: The percentage of track segments (by mode) that have performance restrictions. This performance measure does not apply to the Sheboygan Metropolitan Planning Area, as there is no rail transit in the area.

#### **Safety Targets**

The USDOT established five performance measures for the Highway Safety Improvement Program (HSIP) within the National Performance Management Measures. WisDOT established statewide calendar year 2019 targets for each of the five HSIP performance measures in accordance with 23 CFR 490.209, which were approved at the state level on August 31, 2018. The WisDOT statewide targets are:

- Number of fatalities < 555.7 (a 2 percent reduction from the 2013 2017 annual average);
- Rate of fatalities < 0.915 per 100 million vehicle miles traveled (VMT, a 2 percent reduction from the 2013 2017 annual average);
- Number of serious injuries < 2,967.6 (a 5 percent reduction from the 2013 2017 annual average);
- Rate of serious injuries < 4.785 per 100 million VMT (a 5 percent reduction from the 2013 2017 annual average); and
- Number of non-motorized fatalities and non-motorized serious injuries < 342.0 (a 5 percent reduction from the 2013 2017 annual average).

The Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, agreed to support the statewide safety targets, which were approved by formal resolution on December 14, 2018. This followed several months of measuring these numbers and rates for the Sheboygan Metropolitan Planning Area, and coming to the conclusion that the area had lower incidences and rates for the above measures than statewide averages. Commission MPO staff will work closely with WisDOT and will plan and program projects so that they contribute toward the accomplishment of WisDOT's calendar year 2019 HSIP targets.

#### **Pavement Condition Targets**

The USDOT established four performance measures for pavement condition on the National Highway System (NHS). WisDOT established 4-year (2021) statewide targets for the Interstate system, as well as 2-year (2019) and 4-year (2021) statewide targets for the non-Interstate NHS in accordance with 23 CFR 490, Subpart C, which were approved at the state level on May 18, 2018. The WisDOT statewide targets are:

- Interstate Percentage of pavements in "good" condition: 4-Year Target  $\geq$  45 percent;
- Interstate Percentage of pavements in "poor" condition: 4-Year Target  $\leq$  5 percent;
- Non-Interstate NHS Percentage of pavements in "good" condition: 2-Year Target ≥ 20 percent and 4-Year Target ≥ 20 percent; and
- Non-Interstate NHS Percentage of pavements in "poor" condition: 2-Year Target ≤ 12 percent and 4-Year Target ≤ 12 percent.

The Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, agreed to support the statewide pavement condition targets, which were approved

by formal resolution on October 26, 2018. This followed limited time measuring pavement condition for Interstate and non-Interstate NHS segments in the Sheboygan Metropolitan Planning Area, and coming to the conclusion that the area had higher percentages of Interstate and non-Interstate NHS pavement in "good" condition as well as lower percentages of Interstate and non-Interstate NHS pavement in "poor" condition than statewide averages. Commission MPO staff will work closely with WisDOT and will plan and program projects so that they contribute toward the accomplishment of WisDOT's 4-year (2021) Interstate pavement condition targets as well as WisDOT's 2-year (2019) and 4-year (2021) non-Interstate NHS pavement condition targets.

#### **Bridge Condition Targets**

The USDOT established two performance measures for bridge condition on the NHS. WisDOT established 2-year (2019) and 4-year (2021) statewide targets for the NHS in accordance with 23 CFR 490, Subpart D, which were approved at the state level on May 18, 2018. The WisDOT statewide targets are:

- Percentage of NHS bridges by deck area in "good" condition: 2-Year Target ≥ 50 percent and 4-Year Target ≥ 50 percent; and
- Percentage of NHS bridges by deck area in "poor" condition: 2-Year Target ≤ 3 percent and 4-Year Target ≤ 3 percent.

The Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, agreed to support the statewide bridge condition targets, which were approved by formal resolution on October 26, 2018. This followed limited time measuring the condition of NHS bridges by deck area in the Sheboygan Metropolitan Planning Area. The percentage of NHS bridges by deck area in "poor" condition in the Sheboygan Metropolitan Planning Area was lower than the statewide average. However, the percentage of NHS bridges by deck area in "good" condition in the Sheboygan Metropolitan Planning Area was also lower than the statewide average (one of only two performance measures in which the metropolitan planning area fared worse than statewide averages). In spite of this below average statistic, MPO staff thought it would be best to support the statewide targets at this early stage in the target setting process until more robust data are available over time. Commission staff will work closely with WisDOT and will plan and program projects so that they contribute toward the accomplishment of WisDOT's 2-year (2019) and 4-year (2021) NHS bridge condition targets.

#### **Travel Time Reliability Targets**

The USDOT established two performance measures for overall travel time reliability on the NHS. WisDOT established 2-year (2019) and 4-year (2021) statewide targets for the percentage of person-miles traveled that are reliable on the Interstate, and also established a 4-year (2021) statewide target for the percentage of person-miles traveled that are reliable on the non-Interstate NHS in accordance with 23 CFR 490, Subpart E, which were approved at the state level on May 18, 2018. The WisDOT statewide targets are:

- Percent of person-miles traveled that are reliable on the Interstate: 2-Year Target  $(2019) \ge 94.0$  percent and 4-Year Target  $(2021) \ge 90.0$  percent; and
- Percent of person-miles traveled that are reliable on the non-Interstate NHS: 4-Year Target (2021) ≥ 86.0 percent.

The Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, agreed to support the statewide travel time reliability targets, which were approved by formal resolution on October 26, 2018. This followed limited time measuring the travel time reliability of the Interstate and the non-Interstate NHS in the Sheboygan Metropolitan Planning Area. The percentage of person-miles traveled that are reliable on the Interstate in the Sheboygan Metropolitan Planning Area was higher than the statewide average. However, the percentage of person-miles traveled that are reliable on the non-Interstate NHS in the Sheboygan Metropolitan Planning Area was lower than the statewide average (the second of two performance measures in which the metropolitan planning area fared worse than statewide averages). Again, in spite of this below average statistic, MPO staff thought it would be best to support the statewide targets at this early stage in the target setting process until more robust data are available over time. Commission staff will work closely with WisDOT and will plan and program projects so that they contribute toward the accomplishment of WisDOT's 2-year (2019) and 4-year (2021) travel time reliability targets on the Interstate and of WisDOT's 4-year (2021) travel time reliability target on the non-Interstate NHS.

#### **Freight Reliability Targets**

The USDOT established one performance measure for freight reliability, which is the Truck Travel Time Reliability Index on the Interstate. WisDOT established 2-year (2019) and 4-year (2021) statewide targets for the Truck Travel Time Reliability Index on the Interstate in accordance with 23 CFR 490, Subpart F, which were approved at the state level on May 18, 2018. The WisDOT statewide target is:

• Truck Travel Time Reliability Index on the Interstate: 2-Year Target  $(2019) \le 1.40$  and 4-Year Target  $(2021) \le 1.60$ .

The Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, agreed to support the statewide freight reliability targets, which were approved by formal resolution on October 26, 2018. This followed limited time measuring truck travel time reliability on the Interstate in the Sheboygan Metropolitan Planning Area. The Truck Travel Time Reliability Index on the Interstate in the Sheboygan Metropolitan Planning Area was lower than the statewide average. Commission staff will work closely with WisDOT and will plan and program projects so that they contribute toward the accomplishment of WisDOT's 2-year (2019) and 4-year (2021) freight reliability targets on the Interstate.

#### **Emission Reduction Targets**

The USDOT established three performance targets applicable to air quality nonattainment and maintenance areas. Two of these (Peak Hour Excessive Delay and Non-SOV (Single Occupant Vehicle) Travel) are only applicable in urbanized areas with a population over one million. The

only performance target in air quality nonattainment and maintenance areas that is applicable to the Sheboygan Metropolitan Planning Area involves emission reductions. In Wisconsin, three precursor pollutants are measured for emission reductions: volatile organic compounds (VOCs), oxides of nitrogen (NOx), and fine particulate matter (PM 2.5). WisDOT established 2-year (2019) and 4-year (2021) statewide targets for VOCs, NOx and PM 2.5 in accordance with 23 CFR 490, Subpart H, which were approved at the state level on May 18, 2018. The WisDOT statewide targets (in kilograms per day per \$1,000,000 of expenditure) are:

- VOCs: 2-Year Target (2019) = 12.154 kg., and 4-Year Target (2021) = 30.123 kg.
- NOx: 2-Year Target (2019) = 90.354 kg., and 4-Year Target (2021) = 150.388 kg.
- PM 2.5: 2-Year Target (2019) = 9.043 kg., and 4-Year Target (2021) = 13.820 kg.

In this case, the Sheboygan Metropolitan Planning Area is only responsible for either setting its own 4-year (2021) emission reduction targets or supporting WisDOT's statewide 4-year (2021) emission reduction targets for the precursor pollutants noted above. The Bay-Lake Regional Planning Commission staff consulted with WisDOT staff on where the metropolitan planning area stood relative to all nonattainment and maintenance areas in Wisconsin in regard to emission reductions for the precursor pollutants noted above. USDOT guidance recommends that states and MPOs use FHWA's "CMAQ Public Access System" to set emission reduction targets for precursor pollutants. Unfortunately, there are few CMAQ projects from the Sheboygan Metropolitan Planning Area that are accounted for in the "CMAQ Public Access System." There would be other ways to set targets for the metropolitan planning area, such as using previously calculated emission reduction estimates for projects that were awarded funding in the past two cycles that do not appear in the "CMAQ Public Access System," or assuming that the metropolitan planning area would have approximately 10 percent of the statewide emission reductions (since northeastern Wisconsin typically receives about 10 percent of the CMAQ funding in any given cycle). However, the first option is not advised by USDOT, and the second option is faulty because there are projects in this 10 percent that are outside the Sheboygan Metropolitan Planning Area. For these reasons, the Bay-Lake Regional Planning Commission, as MPO for the Sheboygan Metropolitan Planning Area, agreed to support the statewide 4-year (2021) emission reduction targets, which were approved by formal resolution on October 26, 2018. Commission staff will work closely with WisDOT and will plan and program projects so that they contribute toward the accomplishment of WisDOT's 4-year (2021) statewide emission reduction targets.

#### Linkage of Investments to Established Performance Measures

Federal planning requirements for MPOs for the LRTP and for TIPs mandate inclusion of a description of the effects of these planning documents toward meeting the transportation system performance targets that were established. The next section links projects with investment priorities to those with transit asset management, highway safety, pavement condition, bridge condition, travel time reliability, freight reliability, and emission reduction benefits to the transportation system. Projects programmed in the four years covered by the TIP will assist WisDOT in achieving the various performance targets.

#### Analysis of Transit Capital Projects in the TIP in Regard to Transit Asset Management

There are three transit capital projects programmed in the *Sheboygan Metropolitan Planning Area TIP: Calendar Years 2020 – 2023*:

- Roof Replacement for the Transit Administration and Maintenance Facility in 2020 (funded through the FTA Section 5339 program);
- Replacement of one (1) 35-Foot Fixed-Route Bus in 2020 (funded through the Volkswagen Diesel Emissions Environmental Mitigation Trust); and
- Various Improvements at the Transit Administration and Maintenance Facility in 2023 (involving only local funding at this time).

The first project will improve the overall condition of the facilities component of Shoreline Metro's transit assets. The second project will improve the overall condition of the rolling stock component of Shoreline Metro's transit assets. The third project is likely to improve equipment and/or facilities components of Shoreline Metro's transit assets. All of these projects will take place within the timeframe of the 2020 - 2023 TIP.

#### Analysis of Projects in the TIP in Regard to Safety

#### **Infrastructure Projects**

The 2020 - 2023 TIP contains two projects that will improve safety on the transportation system.

- Construction of a roundabout at the intersection of State Highway 28 and County Highway EE is scheduled for 2020. This project will be funded with STBG funding as well as with state matching funds. Roundabouts typically reduce the rate of angle and injury crashes, and the lower speeds will likely result in less severe crashes.
- Installation of median cable guard on Interstate Highway 43 from County Highway V to County Highway EE/Weeden Creek Road is scheduled for 2021. This project will be funded with HSIP funding as well as with state matching funds. Median cable guard reduces head-on crashes on freeways and expressways by keeping motorists in their direction of traffic rather than veering off through the median into the opposing direction of traffic.

In addition, one reconstruction project (with no increases in capacity), three signal timing projects, one design project leading to resurfacing, and one design and right-of-way acquisition project leading to reconstruction have been programmed in the 2020 - 2023 TIP, all of which should improve safety on the transportation system. Also, five of the eight categories of "grouped" street and highway projects in the 2020 - 2023 TIP involve various forms of highway safety.

#### Surface Transportation Block Grant (STBG) – Urban Projects

The 2020 - 2023 TIP currently contains no STBG Urban projects that are programmed for construction. One or more STBG Urban projects will be selected in late 2019 for the 2020 –

2025 funding cycle, and the 2020 - 2023 TIP may be amended in early 2020 if the selected project(s) fall within the range of that TIP. The STBG Urban program uses ranking criteria to set priorities for funding. The criteria include: plan consistency; current or potential demand (capacity needs); functional classification (including traffic volume within two of the classifications); pavement condition; multimodalism; and safety. Transit improvements and bicycle and pedestrian transportation improvements also have parallel criteria which allow projects in these categories to compete for funding. While not officially included as a criterion, preservation of existing systems has been emphasized in the project selection process over past funding cycles. Projects are scored based on a set number of points for each criterion, resulting in a project ranking and recommendation list for STBG – Urban projects in the TIP.

#### **Bicycle and Pedestrian Safety Projects**

The 2020 – 2023 TIP contains projects that promote bicycle and/or pedestrian safety. Safety education takes place under the Sheboygan County Non-Motorized Transportation Pilot Program (NMTPP) level of effort for program oversight project, which includes some funding for education and outreach. Safety education can also take place under the Sheboygan County NMTPP marketing and branding project. Finally, one construction project and one enhancements "grouped" project are also expected to improve bicycle and pedestrian safety.

#### Analysis of Projects in the TIP in Regard to Pavement Condition

The 2020 - 2023 TIP contains two projects that will improve the pavement condition of the transportation system.

- Construction of a roundabout at the intersection of State Highway 28 and County Highway EE is scheduled for 2020. This project will be funded with STBG funding as well as with state matching funds.
- Reconstruction with no increase in capacity on Superior Avenue from North Taylor Drive to North 29<sup>th</sup> Street in the City of Sheboygan is scheduled for 2020. This project will exclusively be financed with local funds.

Two other projects involve design which will lead to resurfacing of a portion of Interstate Highway 43 from Wilson Lima Road to State Highway 42, and design and right-of-way acquisition leading to reconstruction of County Highway EE/Weeden Creek Road from County Highway OK/South Business Drive to County Highway KK/South 12<sup>th</sup> Street; both of these projects will take place outside the period covered by this TIP.

In addition, three of the eight categories of "grouped" street and highway projects in the 2020 - 2023 TIP involve preventive maintenance on the Interstate highway system, other parts of the NHS, and on the state trunk connecting highway system, which can also improve pavement condition in the area.

#### Analysis of Projects in the TIP in Regard to Bridge Condition

The 2020 - 2023 TIP currently contains no projects that will improve the condition of transportation system bridges. It is possible that the 2020 - 2023 TIP will be amended in 2020 to add one or more projects that will improve the condition of transportation system bridges.

In addition, three of the eight categories of "grouped" street and highway projects in the 2020 - 2023 TIP involve preventive maintenance on the Interstate highway system, other parts of the NHS, and on the state trunk connecting highway system, which could also improve bridge conditions in the area.

#### Analysis of Projects in the TIP in Regard to Travel Time Reliability

The 2020 – 2023 TIP contains at least three projects that will improve travel time reliability on the transportation network. All of these projects involve "addition of radio communication infrastructure, installation of video detection, conducting intersection turning movement counts, and retiming and coordinating traffic signals." In addition, all of these projects involve design in 2020 and implementation in 2021, and each project is funded through the CMAQ program as well as with local matching funds.

- Signal timing on Taylor Drive from Indiana Avenue to Superior Avenue.
- Signal timing on State Highway 23/Kohler Memorial Drive/Erie Avenue from North Taylor Drive to North 9<sup>th</sup> Street.
- Signal timing on State Highways 28 and 42/14<sup>th</sup> Street/Calumet Drive from Indiana Avenue to North Avenue.

It is also possible that other programmed projects may indirectly improve travel time reliability on the transportation network, especially if they are located on the NHS in the metropolitan planning area.

#### Analysis of Projects in the TIP in Regard to Freight Reliability

The same projects that will improve travel time reliability on the transportation network will also improve freight reliability on that network.

It is also possible that other programmed projects may indirectly improve freight reliability on the transportation network, especially if they are located on the NHS in the metropolitan planning area.

#### Analysis of Projects in the TIP in Regard to Emission Reductions

The 2020 - 2023 TIP contains three projects that will lead to emission reductions on the transportation network. The projects include the following:

• Signal timing on Taylor Drive from Indiana Avenue to Superior Avenue (design in 2020 and implementation in 2021).

- Signal timing on State Highway 23/Kohler Memorial Drive/Erie Avenue from North Taylor Drive to North 9<sup>th</sup> Street (design in 2020 and implementation in 2021).
- Signal timing on State Highways 28 and 42/14<sup>th</sup> Street/Calumet Drive from Indiana Avenue to North Avenue (design in 2020 and implementation in 2021).

The three projects listed above involve "addition of radio communication infrastructure, installation of video detection, conducting intersection turning movement counts, and retiming and coordinating traffic signals." Each of the three projects is funded through the CMAQ program as well as with local matching funds.

It should also be noted that CMAQ projects from previous TIP cycles will also contribute to emission reductions in the metropolitan planning area; these projects included a small employment transportation carpool program.

Finally, it should be noted that the 2020 - 2023 TIP may be amended in early 2020 to incorporate additional CMAQ projects.

#### **Conclusion**

The Sheboygan Metropolitan Planning Area Transportation Improvement Program (TIP): Calendar Years 2020 – 2023 implements a variety of projects that assist in either meeting locally established performance targets (in the case of Transit Asset Management) or in assisting the MPO in supporting statewide performance targets established by WisDOT (in the case of all other targets, including targets in the areas of safety, pavement condition, bridge condition, travel time reliability, freight reliability, and emission reductions). Future LRTPs and TIPs are expected to continue to improve the linkage between performance targets and recommended projects over the years to come.

#### APPENDIX J SHEBOYGAN MPO TECHNICAL AND POLICY ADVISORY COMMITTEE MEMBERS
